Highfield Level 2 International Award in
Basic H2S Awareness and Use of EEBA (Onshore)

SAFETY FIRST!

Proper training, equipment, and adherence to safety protocols are crucial when working in confined spaces to prevent exposure to H2S and ensure the well-being of workers.

What are the objectives of this qualification?

To support a role in the workplace. It is intended for learners already working in industries/environments where there is a significant risk of exposure to **hydrogen sulphide (H2S)** gas (eg: oil and gas industry, wastewater treatment plants, rigs, confined spaces, petroleum sector, chemical Industry, laboratories etc).

This qualification will enable learners to understand the properties of H2S; identify the sources and preventive measures to minimise the risk of H2S; suitably respond to H2S alarm and understand appropriate escape response to a H2S emergency incident. Learners will understand the importance of the respiratory protective equipment and detectors and how to properly use and how to check the equipment before use.

How long will it take to achieve this qualification?

To complete this qualification learners should expect to undertake a minimum of **6 hours** of learning.

What are the tutor requirements to deliver this qualification?

Tutors must hold a relevant subject area qualification and/or experience, as well as a relevant teaching qualification and/or experience.

How is the qualification assessed?

This qualification is assessed in **2 parts**.

Part one - Centre marked **multiple-choice questions** - theory assessment: this is assessed through a multiple-choice examination containing 10 questions. The duration of the assessment is 30 minutes. Learners must answer a minimum of 8 questions correctly to pass this exam.

Part two - practical demonstration - this is assessed by learners performing various **practical activities** as listed within the Highfield assessment pack.

Why a Highfield qualification?

Highfield is the leading provider of regulated compliance qualifications in the UK, certificating over 350,000 learners a year.
