PPG Delfleet CVT™

The advanced paint system designed for OEM Buses and RVs

Built for originality

- Fast flash, quick-dry commercial urethane technology
- Unlimited color options—metallics, solid & pearls
- Expert paint process support

Built for speed

If your business builds custom coaches, buses, high-end RVs or paints commercial vehicles with a multi-tone or uniquely-designed finish, the PPG DELFLEET CVT™ paint system was built with your paint operation in mind.

PPG Delfleet CVT basecoat is a 3.5 VOC, acrylic urethane incorporating advanced, high strength toners designed to accommodate special colors and effects. By offering features like thin film build with fast flash and dry times, painters have the confidence to quickly apply taping to lay down multiple colors for enhanced throughput performance and efficiency.

For applications requiring a direct gloss finish, the *PPG Delfleet CVT* single-stage option offers excellent coverage in 2-3 coats, with a fast flash time of 5-10 minutes.

The system includes a choice of 2.1 and 3.5 VOC high build clearcoats designed for fast, wet on wet application, while delivering a hard, high gloss finish with impressive durability.

Basecoat

- Excellent coverage in 2-3 coats
- Film build per coat: 0.5-0.6 mil
- Flash time: 5-10 minutes @70°F (21°C)
- Ready for taping: 5-10 minutes
- Ready for clear: 20 minutes

Clearcoats

- Flash times: 5-10 minutes
- Dust free: 35-50 minutes
- Air dry or bake capability

Direct Gloss

- Excellent coverage in 2-3 coats
- Film build per coat: 0.8-1.2 mils
- Flash time: 5-10 minutes @70°F (21°C)
- Ready for taping: 12 hours

Designers value our robust color palette with support to match

Comparable to the wide choice of colors available on today's passenger vehicles, the *PPG Delfleet CVT* system, with its comprehensive color database, offers a wealth of solid, metallic, pearl and specialty options to match virtually any styling or customer requirement. For custom colors, we offer color-matching support as well as assistance from our PPG Color Matching Laboratory, dedicated exclusively to matching commercial vehicle colors.

PPG PAINTMANAGER® XI Software—Our cloud-based color management system enables painters to efficiently retrieve a color formula and accurately mix the product for every job. Moreover, comprehensive reporting and tracking features enable managers to monitor the paint operation for maximum efficiency and profitability.

PPG DIGIMATCH™ Spectrophotometer—This advanced, compact tool can take an accurate reading of a vehicle color from six camera angles and six reflectance angles, then connects seamlessly with our color management software to retrieve the correct matching formula quickly and efficiently.

Unrivaled service and support come standard

From technical support to training, our team of commercial coating professionals have the proven expertise to support and enhance your paint operation's performance.

Line Study Evaluation

Working together with your key personnel, our commercial coatings experts can analyze your total paint operation process—with the aim of identifying where improvements can be made to speed up throughput, reduce cost and increase overall profitability without sacrificing a quality finish.

The comprehensive study is free of charge and examines everything from prep work procedures to final cure. For example, we evaluate the spray booth and its temperature control, humidity control and air flow. Application equipment and spray guns are assessed, covering such parameters as pressure range and fluid delivery rate. Heat source and its temperature set and cure times are reviewed and evaluated. In all, dozens of touch points are surveyed and analyzed to develop detailed process improvement recommendations.

Technician Training

In addition to on-site training, PPG offers a wide range of curriculum to help ensure that your paint technicians stay abreast of the latest products, technologies and application methodologies.

Training courses are scheduled throughout the year at PPG Business Development Centers across North America. Painters also have online access to the PPG KNOWLEDGE COLLEGE® learning system, offering on-demand training videos on how to achieve the best possible finish.

Of course, whenever on the spot guidance is needed, our experienced technical support stands ready via a dedicated help line.
