# Sovereign Network Group (UK)

Update to credit analysis

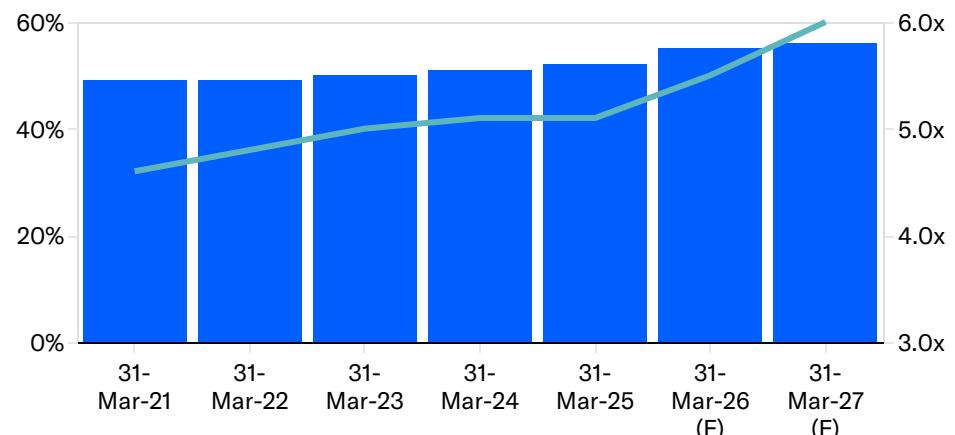

### Summary

The credit profile of [Sovereign Network Group](#) (SNG, A3 stable) reflects its large size, solid operating margins and good financial management. The ratings also incorporate its high indebtedness and large development programme. SNG benefits from the strong regulatory framework governing English housing associations and our assessment that there is a strong likelihood that the government of the [UK](#) (Aa3 stable) would act in a timely manner to prevent a default.

#### Exhibit 1

**Higher leverage expected as SNG ramps up housing delivery**  
**Gearing (LHS) and debt to revenue (RHS)**

 Gearing  Debt to revenue

Prior to fiscal 2024, Sovereign Housing Association only.  
Source: SNG and Moody's Ratings

### Credit strengths

- » Good financial performance though interest covers are now weaker than peers
- » Supportive institutional framework in England

### Credit challenges

- » High leverage to increase further
- » Substantial development ambitions with a moderate exposure to market sales

## Rating outlook

The stable outlook balances the gradual recovery in margins that will support a stabilisation of interest cover metrics albeit at low levels against SNG's ambitious development that will lead to a gradual deterioration in debt metrics.

## Factors that could lead to an upgrade

Upward pressure on the ratings could result from a significant improvement in operating performance, a material reduction in debt and a strengthening in interest cover metrics or a significant increase in government support for the sector.

## Factors that could lead to a downgrade

Downward pressure on the ratings could result from a prolonged weakening in operating performance and/or debt growing more quickly than forecasts with interest cover falling from their already low levels. Lower government support for the sector or a dilution of the regulatory framework would also put downward pressure on the ratings.

## Profile

SNG is a large housing association operating across London and the South of England. It manages approximately 84,000 units. It focuses predominantly on low-risk social housing lettings with a moderate exposure to market sales and some activity in market rent.

## Detailed credit considerations

SNG's A3 ratings combine (1) a Baseline Credit Assessment (BCA) of baa2 and (2) a strong likelihood that the UK government would act in a timely manner to prevent a default.

### Baseline credit assessment

#### Good financial performance though interest cover metrics are now weaker than peers

Following the merger of Sovereign and Network Homes in 2023, SNG is among the largest housing associations in England managing close to 85,000 units across London and the South West. Its sizeable balance sheet supports a higher capacity to absorb shocks than smaller housing associations and grants it robust market position, strong political influence and a competitive edge in development opportunities. As a member of the G15 organisation, SNG also collaborates with other large London-based housing associations to shape housing policy.

SNG's operating margin stood at 20% in fiscal 2025, in line with the median of A3-rated peers. In line with the rest of the sector, margins have reduced due to high cost inflation, a significant increase in spending on repairs and maintenance and past government interventions on rent policy. We expect margins to recover gradually thanks to inflation-linked rent increases and as merger efficiencies start to materialise but remain lower than before the pandemic due to structurally higher expenditure growth. Moreover, SNG still faces fire safety remediation costs on its high-rises of £14 million annually on average over the next three years. That said, SNG has made

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moodys.com> for the most updated credit rating action information and rating history.

more progress than most peers in addressing fire safety with over 56% of its remediation works having already been completed and the rest to be completed by fiscal 2028.

SNG's social housing lettings interest coverage (SHLIC) stood at 0.8x in fiscal 2025, below the 1.1x median for A3-rated peers. SHLIC declined in line with the operating margin in recent years and was also negatively affected by the merger as Network had weak interest cover metrics. We expect SHLIC to remain below 0.8x over the next three years due to higher interest costs associated with SNG's planned increase in leverage. This is in contrast to rating peers for which SHLIC will gradually recover as most HAs have cut development spending to limit debt growth.

#### **Supportive institutional framework in England**

The sector's credit quality benefits from the strong institutional framework governing English housing associations (HAs) reflected in an Operating Environment score of a2 and a Regulatory Framework score of a1. These scores are assigned at a national level and reflect the following credit considerations:

The regulator maintains strong oversight through quarterly returns, long-term business plans, annual reviews, and regular programmed inspections for HAs with more than 1,000 units. The regulator has a strong track record of intervention in cases of mismanagement or financial stress.

The operating environment for English housing associations is supportive. Demand for social housing is very high and English housing associations retain some expenditure flexibility, with a track record of controlling costs to mitigate lower income. We recently upgraded the score to a2, reflecting recent credit-positive policy announcements that will provide greater revenue certainty and expenditure flexibility to the sector, including a 10-year rent settlement at CPI+1% and more generous funding for new and existing assets.

#### **High debt to revenues with strong additional borrowing capacity**

SNG's debt metrics are weaker than peers. As of FYE 2025, its total outstanding debt was £4.1 billion, equivalent to 5.1x revenue (A3 peer median: 4.5x) and 52% of its assets (A3 peer median: 52%). We forecast that debt metrics will gradually deteriorate over the next five years, reflecting SNG's ambitious development programme and the need to invest in its existing stock, particularly for retrofitting.

Its debt structure is relatively low risk with 15% of drawn debt due for refinancing within the next five years and around 12% of its debt at variable rates. SNG has strong additional borrowing capacity with unencumbered assets of £2.2 billion as of June 2025, enough to cover the next five years of net funding needs. Its covenant headroom is sufficient with 94 basis points over its tightest interest cover covenant. SNG renegotiated and simplified its covenants as part of its merger to be based solely on EBITDA rather than EBITDA MRI, which strengthened its headroom.

SNG has decent liquidity with cash and undrawn facilities available within 48 hours of over £1 billion as end-September 2025. This is sufficient to cover 0.8x projected net funding requirement over the next two years. We expect liquidity to remain adequate but remain weaker than peers given that SNG's liquidity rules include 75% of market sales receipts.

#### **Substantial development ambitions with a moderate exposure to market sales**

SNG has a moderate development plan with around 2,300 units to be delivered annually over the next five years, representing around 15% of its current stock. As a result, its net capital expenditure will remain much higher than peers at 67% of turnover on average over the next five years compared to 28% for the median of A3-rated peers.

Its development plan is split between low-risk social housing lettings and market sales, including 29% of shared ownership units and 14% outright sales. Its appetite for market sales is higher than peers with a golden rule of a maximum of 35% of turnover. In fiscal 2025, sales accounted for 13% of its turnover, mostly first-tranche shared ownership, and are projected to increase to 19% in fiscal 2026 driven by a higher exposure to outright sales.

The majority of its outright sales are delivered through joint ventures (JVs) with housebuilders or have already been sold to developers, mitigating some of the risks associated with the property market exposure of outright sales. We also note that SNG has been able to maintain good sales margins of 15% on average over the past three years.

## Extraordinary support considerations

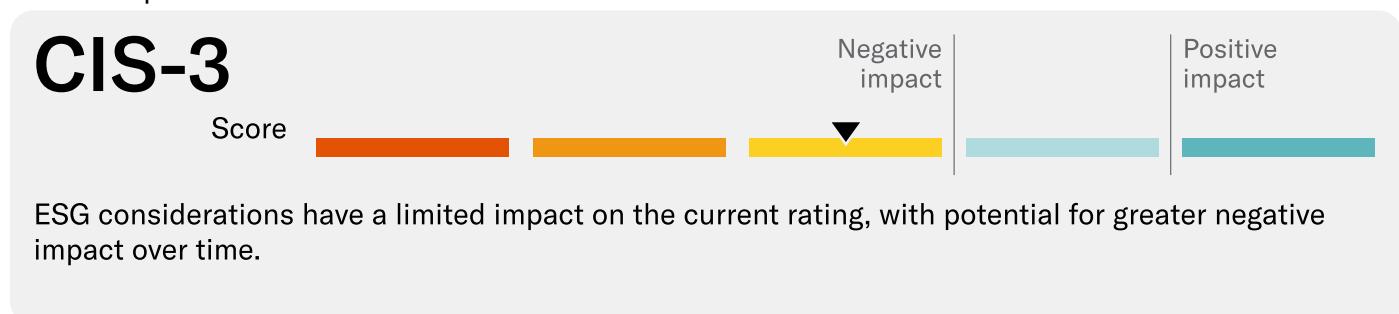

The strong level of extraordinary support factored into the rating reflects our view of the UK government's support for the housing association sector due to its political, economic and social importance. Extraordinary support for the sector is predominantly exercised through sector regulators whose wide-ranging powers in cases of financial distress include facilitating mergers. However, this process can be protracted and is reliant on HAs agreeing to merge, which is more challenging in a weakened operating environment, with high expenditure pressures and high borrowing costs. In addition, our assessment that there is a very high default dependence between SNG and the UK government reflects their strong financial and operational linkages.

## ESG considerations

**Sovereign Network Group's ESG credit impact score is CIS-3**

Exhibit 3

ESG credit impact score

Source: Moody's Ratings

ESG risks have a material impact on SNG's ratings (**CIS-3**), mostly as a result of expenditure requirements related to carbon transition and fire safety.

Exhibit 4

ESG issuer profile scores

Source: Moody's Ratings

### Environmental

SNG has some exposure to environmental risks (**E-3**), mostly carbon transition because over a quarter of its stock will need to be retrofitted to meet EPC-C by 2035, which will weigh on its margins.

### Social

SNG has a material exposure to social risks (**S-4**) due to legal requirements to improve the safety of its existing stock and the vulnerability of the sector to tenant affordability considerations through the government's social rent policy. Those risks can materialise in the form of reduced operating margin and interest cover metrics.

### Governance

SNG's governance is robust (**G-2**) with clearly identified policies and golden rules shaping its management of risk. Management and the Board are responsive to adverse events.
