Celebrate Purple Friday at the Faculty of Science!

The Faculty Student Council (FSR) invites you to celebrate Purple Friday on Friday 9 December! On this day, Science Park turns purple in solidarity with the LGBTQ+ community.

Make sure to wear purple clothes if you want to show your support for the LGBTQ+ community, and stop by your study association to see their decorations and fun initiatives.

In the central hall of Science Park 904, the FSR organises two lectures in collaboration with Bètabreak. One of the lectures will be on transgender healthcare. The topic of the other lecture will be announced soon. Afterwards there are drinks and the possibility to talk in the Brainwave.

New IIS electives second semester

Improve your
professional skills

Thinking about the next steps after your Master's degree? Want to acquire general professional skills in addition to the specialised knowledge and skills from your field, to help you in your future career inside or outside the academic world?

The Faculty of Science now offers a new learning trajectory specifically aimed at developing academic, professional and personal skills that can help you on the job market. The learning trajectory consists of 1.5 ECTS elective courses and is intended for Master's students.
