

DONOR SEARCH & REQUEST SUPPORT

OBJECTIVE

Support transplant centers in countries without a national registry to get access to international donors

BENEFIT

- **Access to >41 million donors** and other cellular therapy products (CBU/ADCU) worldwide
- **Dedicated team** of experienced **search coordinators**
- Detailed **search report** and **donor selection recommendations** within **one working day**
- **Services around procurement** of stem cell donor products

OUR SERVICE OFFER

- **Education and training** on processes needed to successfully obtain stem cell products globally
- 24/7 web-application **Hap-E Search®** to **track all patient cases**
- **Support** for your team during the **donor search process, selection** of the best matched donor - including verification typing - and donor **workup up to product transportation** to the transplant facility.

Together
we establish MUD
transplant in your
center!

GETTING ACCESS

- Transplant centers must have experience with related donor transplantation and all diagnostic infrastructure must be in place.
- Together, we will clarify access to HLA high-resolution typing, import/export requirements and other factors needed to participate in international exchange.
- **Contact hapesearch@dkmsregistry.org** to receive further information and your individual offer.
