

Donor Navigator

Web Application

Benefit

- Access to about 10 million DKMS donors
- Search for additional donor data (e.g. CMV status, CCR5, HLA-E, KIR, MICA/MICB)
- Online requests including online tracking and electronic completion of workup forms

Features

With the Donor Navigator® software, international registries, search units and transplant centers have access to about ten million donors from DKMS donor centers in Germany, UK, Poland, Chile, India and South Africa. Registration and use of the software are free of charge.

Using Donor Navigator®, you can look up detailed donor information relevant for your unrelated donor search and initiate the following types of donor requests:

- HLA (extended) typing requests: obtain a 6 loci high resolution HLA typing result
- Infectious disease marker (IDM) testing: Screen donor IDMs (also included in VT)
- Health and Availability Check (HAC): check donor's medical suitability and availability
- Verification typing (VT, also known also confirmatory typing): IDMs, blood sample for HLA verification typing, medical suitability and availability check
- HSC apheresis/bone marrow (PBSC / BM workup)
- MNC apheresis for donor lymphocyte infusion

Functions

- Do you want to apply to use Donor Navigator? Please download and fill in the **registration form** (<https://professional.dkms.org/services/tools/donor-navigator>).
- In case of further questions or to send the filled and signed registration form, please contact donornavigator@dkmsregistry.org.
- **DKMS Registry** will enable your access to Donor Navigator® and will **offer an online training** that explains the features of Donor Navigator® in detail.
