

# DONOR TYPING QUALITY

## BENEFIT

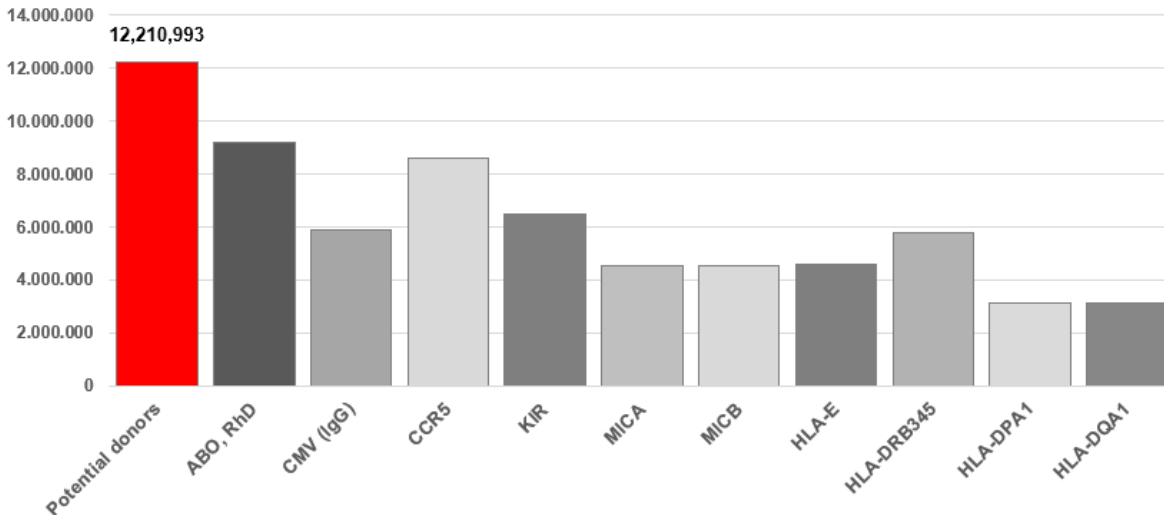

Quickly identifying a matching donor saves time

## FEATURES

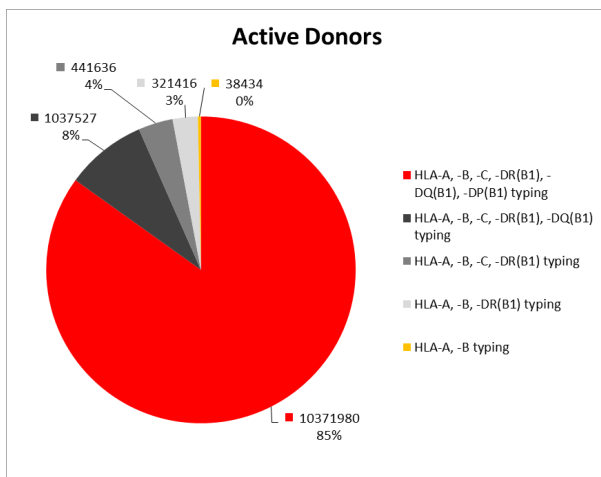

DKMS strives to maintain a high standard of quality in HLA data. All newly registered donors are typed in HLA-A, -B, -C, -DRB1, -DQB1, -DPB1, -DRB 3/4/5, -DPA1, -DQA1, CCR5, ABO, RhD, and are analysed for CMV status. Additionally, for approx. 10% of all newly recruited donors, we also type KIR, MICA and MICB plus HLA-E.

## RESULTS

### Additional markers DKMS Donors\*

### Data quality - DKMS global\*

\*as of January 2<sup>nd</sup> 2024  
basis: 12.2m active donors
