SELECTED DONOR(s)

GRID number(s)	
1.	
2.	
3.	
4.	
5.	

ADDITIONAL INFORMATION

Requested method (PBSC or BM):

Planned collection date:

DISCLAIMER:

- A HAC should be performed **instead of**, and not in advance of a CT request. It is not intended that the TC request a CT after a completed HAC. If the donor's IDM testing results are needed for donor selection, a CT would be the adequate initial request
- Similar to CT, the donor will be informed, a health check and medical clarification will be performed.
- IDMs and HLA confirmation need to be performed in a subsequent CT+WU request.
- With the completeness of information sessions, the donor will be reserved for 3 months

Person completing form (printed name):	Date (DD.MM.YYYY):	Signature:
