

# CLINICAL TYPING PROFILE

## HIGH RESOLUTION, LONG RANGE HLA TYPING BY NGS

### BENEFIT

- patient related pre-typing, confirmatory typing, verification typing on demand and available within 2-7 business days
- high resolution, long range HLA typing by NGS (Next Generation Sequencing)
- experienced and knowledgeable in finding the best matched donors

### FEATURES

DKMS Life Science Lab's clinical team performs all patient, family and unrelated donor typings on demand. The connected search unit carries out donor searches for individual patients both among relatives and unrelated potential donors.

### RESULTS

Choose your clinical profile

#### Basic profile

- HLA-A, -B, -C
- HLA-DRB1, -DQB1, -DPB1

#### Extended profile

- HLA-DPA1, HLA-DQA1, HLA-DRB3, HLA-DRB4, HLA-DRB5
- Results available within 5-7 working days

#### Additional marker upon request (for specific countries only)

- Antibody screening and specification (Luminex)
- Crossmatch testing (CDC)
- Additional analyses

#### Search for stem cell donors

Our EFI + DIN EN ISO 15189 accredited lab and ZKRD accredited search unit conduct patient, family and unrelated donor searches. Thanks to our close partnership with the ZKRD, many years of experience and access to a global network, our search unit can find reliable donors quickly.
