

# Have a successful vaccination

Save or screenshot this page and bring it to your next visit to the veterinarian to ensure your dog is protected against the risks of Lyme disease and leptospirosis.

## TALKING POINTS

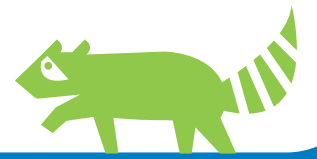

1

**Review your dog's vaccination history.**

2

**Discuss where and how long your dog spends time outside, and whether you ever see any wildlife in your area.**

3

**Ask your veterinarian about how highly purified vaccines lead to a more comfortable vaccination experience for dogs.**
