Knowledge Solutions

30 day free trial

Customizable market data platform for cattle feeders to improve operation management and profitability.

PenPoint Market

PenPoint Market delivers comprehensive, real-time commodity quotes and financial calculators to help manage risk, value expected asset performance and make sound management decisions. Powered by QT Data.

Breakeven calculator

Using historical Elanco Benchmark™ closeout data, customizable parameters for your specific feeding operation and real-time live cattle futures data, the integrated market calculator projects profitability or loss for incoming calves. A steady rise in input costs makes modeling expected cattle performance and efficiency essential to business success.

Input

- Geographical Region, Grain Processing and Technology Impact
- Cattle Data
- Projected Output

Receive

- Exclusive, confidential analysis that minimizes business risk and maximizes your investment with planning

Right for cattle. Right by you.
