

SURVIVES  
*IN* EXTREME  
CONDITIONS

**TITAN® technology ensures protection and viability of the active dry yeast during rigorous pelleting processes<sup>1</sup>**

**A unique and patented microencapsulation technology\*** protects the active dry yeast throughout both feed processing and storage

**The protective coating that remains after pelleting** solubilizes in digestive tract, releasing the active dry yeast

\*Lallemand Patent EP 2099898B1

**Ask your Elanco Animal Health representative** about numerous academic and commercial trials demonstrating the unique capacity of Levucell SB TITAN to survive pelleting conditions.
