

ORIOR publishes its Sustainability Report 2025

The internationally active Swiss food and beverage group ORIOR is publishing its eighth sustainability report. The GRI-compliant report provides detailed coverage of projects, progress and challenges. It underscores the Group's conviction that sustainable action and economic success are interdependent, and that environmental efficiency significantly strengthens operational resilience.

Highlights from the reporting year

- Most key performance indicators trended positively during the reporting year, with good progress achieved in energy (–3.3%) and water intensity (–4.3%) as well as in food waste (–10.4%).
- The Science Based Targets initiative (SBTi) officially validated ORIOR's climate targets, thereby confirming alignment with the 1.5 °C target of the Paris Agreement.
- The internal ORIOR Climate Fund was successfully launched at the start of 2025 and the first projects to reduce emissions were approved.
- With the successful rollout of the new ORIOR Supplier Code of Conduct, minimum ethical, environmental and social standards have been embedded throughout the supply chain.
- The strategic partnership between Le Patron and the FoodTech start-up Yumame Foods is driving the development of nutrient-rich, plant-based product alternatives for a future-oriented diet.

In the coming year, the focus will be on further specifying the climate pathway. In doing so, ORIOR is concentrating on drawing up decarbonisation plans and on new target agreements with the federal government as part of national climate legislation. In addition, further steps required to comply with regulatory requirements, such as the EU Packaging Regulation, will be initiated.
