### **Customers with characteristics of vulnerability**

The Product is designed for the fixed rate market, which is likely to include some customers with characteristics of vulnerability or who will experience vulnerability over time.

Fixed Rate customers may be less likely to have a comprehensive understanding of the mortgage market and the implications of taking a fixed rate product, particularly in a reducing rate environment. They could seek support from the broker or utilise our direct channel to acquire additional advice. This could increase their understanding of the information being presented to them and the implications of the arrangement they are entering into to reduce the risk of harm occurring.

We considered the needs, characteristics, and objectives of customers with characteristics of vulnerability at the design process stage of this product to ensure the product meets their needs.

We regularly conduct testing and monitoring of our product range to ensure good outcomes for our customers. This testing and monitoring includes a proportion of customers who have characteristics of vulnerability.

We have in place a framework to achieve good outcomes for vulnerable customers, which includes:

- Education and training for our staff to ensure they have the appropriate skills and experience to recognise and respond to the needs of vulnerable customers
- Suitable customer service provision and communications
- Multiple contact methods are available
- Tailored communication requirements are available on request
- Flexible policies, where appropriate, to support vulnerable customers
- Monitoring to ensure we continue to meet and respond to the needs of customers with characteristics of vulnerability.

Intermediaries should continue to comply with your obligations to ensure that you treat customers in vulnerable circumstances fairly.

Please contact us if you need any further information about how we support the needs of all our customers in relation to the product.
