

Seeking Shelter?

A shelter is a home - it's where a creature lives and sleeps.
They are all around us and some are big, others small.
Take this sheet outside with you and start to look around!

The Gruffalo's home is quite big!
He lives in a cave in the deep dark
wood. Can you see any caves?

Fox lives in an underground
house. Can you see any holes in
the ground that could
be Fox's house?

Where might Owl live?
If you look up at the trees, can you spot him?
Where might Snake live?
What other creatures live in log piles?

If you look very careful-
ly you might see a small
hole in a rock, or a tree.
Maybe Mouse lives there!
