

End-Point Assessment for

ST0550 Safety, Health and Environment (SHE) Technician v1.4

Level 3

Working as a safety, health and environment technician

A SHE technician will be able to work in organisations of varying sizes and in various industries. The technician will work with the management and delivery team of the organisation to advise on the statutory health, safety and environmental requirements as they affect the company's operations. They will assist the management team in ensuring that the legal and company SHE requirements are implemented. On a daily basis the SHE technician will assist to develop, review and check on the implementation of safe systems of work, deliver training (e.g. toolbox talks and inductions), investigate incidents, analyse data and present findings to the management team. The SHE technician will engage with all aspects of the organisation to support the implementation of a culture that ensures everyone is able to return to their family and friends unharmed every day while also protecting and enhancing land, air and water resources for future generations.
