

# Colored lane treatments

## Methyl methacrylate resins with hardwearing aggregate and premium pigments

ENNIS-FLINT<sup>®</sup> by PPG MMA<sup>®</sup> MMA colored lane treatments delineate bike lanes, bus lanes and parklets, making them ideal for long-lane vehicle traffic areas.

Available in four standard colors:

Green

Transit Red

Desert Khaki

Terracotta

### Design

Increases awareness of shared roadway use  
Provides long-lasting color retention, especially against UV rays  
Promotes a balanced multi-modal transportation network

### Installation

Applied in a wide range of temperatures and climates  
Open to traffic in approximately 20-60 minutes  
Pre-packaged kit for on-site mixing and convenience

### Safety

Remarkable traction meets non-slip requirements for pedestrians and cyclists  
Enhances visibility of dedicated lane while providing clear delineation and traffic calming

### Compliance/Certification

Green meets FHWA chromaticity coordinates for use in bike lanes  
Facility is ISO 9001:2015 certified for the design, development and manufacturing of colored lane treatments
