

PPG Commercial technologies for reducing OEM Scope 1 / 2

ZircoBond® Thin film zirconium pretreatment

- Elimination of phosphorous and nickel; excellent corrosion protection and paint adhesion
- Light-weighting enabler— up to 100% aluminum content
- Reduce chemical usage, water usage, heat duty & sludge production; **CO₂e reduction and massive water footprint reduction**

- Non-tin catalyzed, high throw power electrocoat
- Exceptional smoothness for optimal appearance with compressed process decorative coatings
- Expanded cure window: 140°C capable; optimized for thicker BEV body
- **Lower applied costs, CO₂e reduction:** reduced oven heat duty

Enviro-Prime® EPIC series

PPG offers solutions to reduce Waste, Water and Carbon Footprint from paint lines
