

# PPG Global Community Engagement in 2021

As neighbors reunited and classrooms welcomed back students, PPG and the PPG Foundation engaged our community partners and employee volunteers to help create thriving, resilient communities in the areas we call home. Throughout 2021, we mobilized the unique talents of our **employees**, transformed **classrooms** and communities, helped inspire future diverse and innovative **STEM leaders** and addressed **essential needs** around the world.

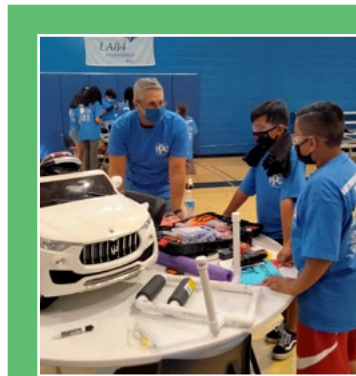

## We believe in...

### ENGAGING EMPLOYEES

Inspired to improve the lives of others, our employees **VOLUNTEER** their time and talents to participate in career panels, mentor aspiring chemists and share science experiments

in classrooms. Their actions demonstrate the real-life possibilities of science and technology and highlight career paths for the next generation of diverse STEM leaders, all while creating classrooms and spaces where students and community members can thrive.

Teaming up with the X-Bots Robotics Mobility Program, PPG volunteers in southern California joined students from a high school robotics team and local Boys & Girls Clubs to gain engineering skills by building specially designed physical therapy cars for toddlers with cerebral disorders.

### TRANSFORMING COMMUNITIES

We have a role to play, as an employer and neighbor, to **PROTECT** our communities. The transformative power of our paint comes to life in the hands of our employee volunteers and

the COLORFUL COMMUNITIES® program as classrooms become colorful, engaging and vibrant environments. Through grants and employee driven giving programs, we meet essential needs in our communities facing inequities, natural disasters and recovering from the pandemic.

At the Yuhong Primary School in the Jiading District of Shanghai, China, students studied in an outdated environment with limited access to educational resources until PPG volunteers beautified classrooms with fresh shades of color and donated classroom supplies.

### EDUCATING STEM LEADERS

Whether it's funding hands-on activities and experimentations, connecting students to STEM role models and mentors, or supporting post-secondary students, we are committed to creating

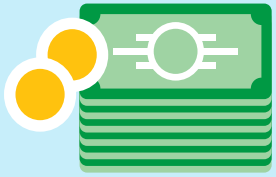

**EDUCATIONAL PATHWAYS** and successes for diverse STEM leaders.

In Spain, 600 students flexed their STEM muscles through the PPG-funded Desafío ASTI Robotics Challenge, a national competition in which teams of students design, build and program a robot that can successfully navigate a range of obstacles.

# PPG Global Community Engagement in 2021

**\$13.3MM**

PPG and PPG Foundation global giving in 2021

**500+** worldwide partners

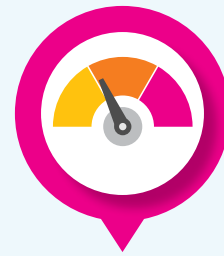

## COMMUNITY SUSTAINABILITY

**\$4.8MM+**  
to community revitalization

**\$1.1MM+**  
to disaster and COVID relief efforts

**DIVERSITY, EQUITY AND INCLUSION**

**\$20MM by 2025**

committed to address systemic racism and advance racial equity in the U.S.

**37% progress**

toward DE&I goal, focused on programs targeting Black communities and people of color in the U.S.

## COLORFUL COMMUNITIES®

**50%** of projects transformed learning spaces in 2021

**600K+** students impacted in 2021

**EDUCATION**

**\$6.6MM+**  
total invested globally in education

**\$2.6MM+**  
applied to university partnerships and scholarships

**2MM+**  
students reached

**\$875K+**  
to science centers

### From 2015-2021

**386 projects**  
completed in 42 countries

**18,000+**  
employee and community volunteers

**7.4MM+**  
students, seniors, teachers, patients and community members impacted

**38,000 gallons**  
of PPG paint products (143,000+ liters)

**\$8.8MM+**  
in funding

**120,000+**  
volunteer hours

**\$675K+ MATCHING GIFTS**
