

Durable markings for airfields

Achieve increased value and performance with durable pavement markings

Installed by a network of certified applicators, ENNIS-FLINT® by PPG AIRMARK® durable markings are engineered to meet federal specifications with the objectives of safety, durability, workmanship and proven performance.

Available in five standard colors:

Red White Yellow Black Pink

Design

Designed for use on taxiways, ramps, aprons, gates and airside vehicular roadways

More efficient and longer lasting than paint

Resistant to aviation fuels, motor fuels, lubricants and de-icers

Installation

Application method for multi-color markings is less labor intensive than paint

More markings can be applied during runway closure time

Safety

An essential element of a Safety Management System because traffic guidance is provided on all areas of the runway

Retroreflective glass beads are mixed throughout material at time of manufacturing, with new beads exposed as the marking wears

Compliance/Certification

Made according to current FAA AC 150/5340 or ICAO standards
Facility is ISO 9001:2015 certified for the design, development and manufacturing of preformed thermoplastic
