

Extra-flexible pavement markings

Engineered to extend the life of your pavement marking program; ideal for cold-weather applications

ENNIS-FLINT[®] by PPG PREMARKXF[®] extra-flexible preformed thermoplastic markings provide enhanced flexibility and impact resistance.

Two options are available. Beaded includes uniformly applied surface and intermixed anti-skid beads. As the marking wears, new beads are exposed. VIZIGRIP[®] visibility and anti-skid treatment maximizes skid resistance and adds retroreflectivity.

Design

Heavy-duty, intersection-grade pavement marking material

Two-year shelf life allows for broader options for inventory management

Made with up to 60% recycled material

Installation

Pre-cut and ready to use out of the box

No minimum road or ambient temperature requirements for application

Preheating the road surface is not required

Pedestrian Safety

Available with retroreflective beads and/or anti-skid elements distributed evenly throughout material for enhanced visibility and slip resistance

As material wears, new beads are exposed

Compliance/Certification

ADA-compliant pedestrian and wheelchair friendly surface
Facility is ISO 9001:2015 certified for the design, development and manufacturing of preformed thermoplastic
