

## Impressed surface system

### Preformed thermoplastic crosswalks and traffic-calming surfaces for asphalt

ENNIS-FLINT<sup>®</sup> by PPG TRAFFICPATTERNSXD<sup>®</sup> preformed thermoplastic is an extremely durable material that incorporates a unique aggregate-reinforced formula with enhanced wear resistance.

The result is a traffic-tough, long-lasting crosswalk with a traditional, brick-like aesthetic.

#### Design

Enhanced durability provides optimum wear in a variety of climates  
Interconnected, 150-mil sheets with anti-skid elements  
Available in a variety of patterns, borders and colors

#### Installation

Applied to high-quality, stable asphalt with minimal substrate impact  
Fast installation and minimal traffic downtime

#### Pedestrian Safety

Anti-skid elements distributed evenly throughout material for enhanced slip resistance  
As material wears, new anti-skid elements are exposed

#### Compliance/Certification

ADA-compliant pedestrian and wheelchair friendly surface  
Facility is ISO 9001:2015 certified for the design, development and manufacturing of preformed thermoplastic

## Installation

*TrafficPatternsXD* preformed thermoplastic material is installed by a network of certified applicators, so you can be confident your design will be brought to life. The 2' x 2' sheets of interconnected material are positioned on a non-stamped, prepared asphalt surface. The material is heated to allow proper embedment of the anti-skid elements. A specialized grid gently stamps a pattern into the material and the top layer of the asphalt. For more information, please contact your PPG sales representative.

Step 1: Prepare

Step 2: Position

Step 3: Heat

### Standard Patterns (2' x 2' sheets)

Offset Brick

Diagonal Herringbone

Standard Herringbone

Slate
