

Fluoropolymer touch-up and repair coatings

Factory-applied performance. Field-applied convenience.

PPG DURANAR[®] ADS (Air Dry System) is a high-performance, one-component fluoropolymer designed for fast, reliable touch up and repair of FGIA/AAMA factory-applied coil and extrusion finishes like PPG *Duranar* liquid coatings and PPG CORAFLO[®] Platinum powder coatings. Powered by the same 70% PVDF resin technology used in PPG's industry-leading *Duranar* coatings, it delivers factory-grade durability in a convenient field-applied solution.

Engineered for exceptional resistance to UV exposure, chalking, fading and environmental wear, the premium air-dry formulation is ideal for spot repairs, helping reduce labor and material costs compared to full recoating, panel replacement or removal and reinstallation of components.

Versatile and easy to apply via a variety of methods, *Duranar* ADS coatings can be matched to a wide range of colors, gloss levels, metallics and special effects to blend seamlessly with existing coil and extrusion finishes.

Suggested industries

Building products

Suggested end uses

Building panels

High-end storefronts

Curtain walls

Roof panels

The PPG benefit

Engineered for touch up and repair of FGIA/AAMA liquid and powder factory-applied coatings

Can match most *Duranar* and *Coraflo* Platinum colors, including solid, mica, metallic and pearlescent colors

Can be used over painted aluminum and steel or with primer on bare metal

Available in bottles, dauber pens, quarts, gallons and aerosol spray
