Liquid

Precision, efficiency and expertise

PPG's Coating Services business combines our full suite of pretreatment, electrocoat, powder and liquid products with our globally recognized expertise to build and manage coatings application lines tailored to your specific needs.

Our comprehensive product line, industry-leading technical capabilities and global resources translate into strong partnerships that thrive on customized services, efficiency and innovation.

Coatings solutions tailored to your specific needs

Our multi-tiered coatings solutions help you maximize profits, efficiencies and opportunities while delivering the most value to your customers. Each level of coatings application support is backed by PPG's industry-leading technologies and designed to meet the distinct demands of your business.

Coatings solutions

Engineering solutions

Custom-built coating lines

We are the only coatings services business with the skill, capacity and expertise to design, build, install and commission an in-house coatings system tailored to your specific application.

When you choose our Engineering Solutions system, you choose the global resources of PPG and our specialized coatings teams. Whether you're applying powder coat, electrocoat or specialty coatings like polyureas, our Engineering Solutions team partners with you to build processes that meet your customer's requirements no matter the industry.

But we don't stop there.

We carefully train your employees to operate every facet of your customized line and conduct rigorous post-installation testing to make sure everything operates precisely to your specifications. As an added value, our INSITE® coatings services team can also manage and operate your PPG-installed line, saving you time and allowing you to focus on opportunities that grow and strengthen your business.

This end-to-end expertise can help set your coatings performance apart, amplifying your finishing efficiencies, reducing logistics costs, and enhancing the performance and longevity of parts.

We are your single point of contact every step of the way, helping to ease and streamline your operations, and saving you the time, unexpected costs and challenges that come from building your own line.

Coatings solution

INSITE® coatings services

*Customized in-house support
to maximize your lines*

With *Insite* coatings services, our team is on-site or nearby your facility to help operate, manage and maintain your PPG-installed coatings line. You will have ready access to our full coatings portfolio, technical know-how and decades of coatings experience across industries ranging from the automotive and data center sectors to electric vehicle and heavy-duty equipment markets.

Relying on the operational expertise of our *Insite* team can be a natural next step for our Engineering Solutions customers, giving them a 360-degree coatings experience. It also makes sense for

companies that partner with us to install their line but may not have the time or expertise to operate it.

With *Insite* services, our customers can profit from the competitive advantages that come with a well-run coatings line – without the hassles of managing one. What's more, our customers gain access to proven processes and inventory control systems that can help simplify supply chains, removing links that are no longer necessary and reduce bottom lines.

Customized coatings portfolios

As a PPG partner, your business has access to our full suite of high-performance coatings, all engineered for exceptional protection and durability, and backed by decades of our industry-leading technical and support services.

Our coatings portfolio integrates the latest technologies with customized value-driven solutions. This strategic advantage gives you a competitive edge in today's shifting marketplace, positioning your business for growth and maximizing your power as a customer.

Pretreatment and Engineered Products

Our pretreatment solutions clean and decontaminate surfaces of impurities, boosting corrosion protection, preventing oxidation that can impact structural integrity and promoting adhesion of primers and topcoats.

Electrocoat

As pioneers in electrocoat technology, our products create an exceptional first line of defense against corrosion, delivering uniform coverage across edges, corners and recesses.

Powder

Our sustainably-advantaged* powder technologies offer exceptional protection and durability against corrosion, abrasion, chipping and fading on steel, aluminum and other industrial substrates.

Liquid

Our high-performance, waterborne and solventborne liquid coatings offer proven defense against rust, corrosion, moisture and chemical damage across steel, concrete, electronics and other Class-A surfaces.

* Sustainably advantaged products are identified using PPG's internal methodology that validates product attributes and their contribution toward the U.N. Sustainable Development Goals.

Coatings solution

General purpose coatings centers

PPG-owned facilities that coat and finish parts to your specifications

With expertise in powder, liquid, electrocoat and pretreatment coatings technologies, our coatings centers finish parts of nearly every shape, size and substrate to your exacting specifications. The result? Enhanced quality control that can lower operating and overhead expenses across your business.

Our network of over 20 advanced coatings centers are located throughout North America and Europe, providing nearly 1,000 original equipment manufacturers (OEMs), tier suppliers and parts manufacturers worldwide with the durable, cost-effective offsite coatings solutions they need.

Added value and support

Our coatings solutions take support services beyond expectations, offering customers specialty features that can improve efficiencies, reduce cost and maximize line operations.

- Custom assembly, packaging, labeling and bar coding
- Logistics
- Inventory control
- Real-time process monitoring
- Automated masking
- Specialized fixtures
- Direct shipping to end users
- In-house testing with A2LA accredited performance labs
- IATF16949:2016 registered and compliant, and ISO14001-2015 compliant

Powering possibilities across industries

For more than 50 years, PPG's Coatings Services business has met the diverse needs of industries around the world. With roots in the automotive original equipment manufacturer sector, our portfolio has grown to meet the demands of established markets while supporting the needs of emerging industries.

Engineered to meet stringent industry standards, our suite of durable coatings can deliver a wide range of benefits that extend from advanced thermal protection to effective dielectric strength. By extending the applications of our coatings, we can help you anticipate your coatings needs and build a more resilient, future-ready environment.

Global benefits, local service

When you work with PPG, you connect with the products, services and technical know-how of one of the world's largest, most innovative coatings companies. This includes materials experts, researchers, technicians and others who can guide you through emerging technologies and make sure you have the right coatings for the job, now and in the future.

A trusted global coatings leader

Over 140 years in business with operations in 50+ countries

Renowned color expertise

Trend-setting palettes for home, auto and industry paired with unrivaled color matching

Commitment to sustainability

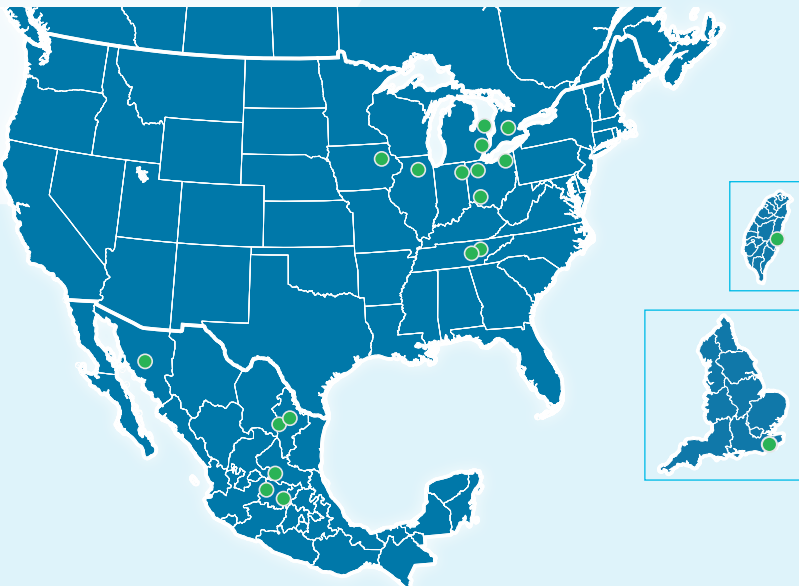

43% of annual sales from sustainably advantaged products and processes

Dedication to innovation

3,000+ technical employees with 700+ new coating patents over the past 10 years

As an added benefit, our highly responsive general purpose facilities are strategically located throughout the world, giving you quick access to coatings solutions that can resolve unexpected customer demands or adapt to your changing business profile without interruption.

PPG general purpose coatings facilities

U.S.A., Canada and Mexico

Easily accessible to North American manufacturers, with advanced powder coatings technologies at our Ontario, Ohio, Michigan, Illinois and Tennessee sites.

Taiwan

Electrocoat and fastener coatings solutions for the automotive and industrial sectors.

Daventry, U.K.

Powder, electrocoat and liquid paint for the automotive and industrial sectors, and specialized anti-corrosive coatings for the rail, mining and energy markets.
