

Reengineering Spiral Wound UF Elements

Increase electrocoat production, reduce consumables and save costs with PPG's next-generation UF filters

- Exceptional filtration efficiency, higher flux rates and longer life
- Standard configurations available for a drop-in replacement
- Capable of being backwashed to extend life of elements
- Competitively priced

ppgfiltration.com

Part of the electrocoat system, PPG UF filters help recover paint, purge the tank of ionic contamination and reduce conductivity to generate the clean permeate that rinses coated parts.
