

Powerful protection

Complete coatings services
solutions for electric vehicles
and components

PPG's Coatings Services business has protected more than 95 million EV-related parts since 2018. We offer industry-leading expertise in designing and building customized coatings lines specifically for EV applications. Our full suite of coatings solutions deliver exceptional corrosion, impact and dielectric protection, ensuring the longevity and durability of your EV components.

High-performance product and service portfolio customized to your needs

Tailored coatings solutions

Application lines with advanced e-coat, powder, liquid, pretreatment, and specialty technologies that can provide electrical insulation and protect against corrosion, impacts and thermal risks

Invested in protection

Top-tier material handling techniques and advanced automation that protect your parts

Aftermarket service

Wide range of coordinated in-house services that streamline your supply chain, including packaging, hem sealing and just-in-time direct shipping

Strategic locations

Over 20 high-tech coatings application centers delivering quality and reliability across North America and around the world

The PPG advantage

Global expertise

Backed by teams of local and regional coatings experts

Single-source supplier

Premier coatings supplier for every vehicle surface

Engineering Solutions*

Build expertise for customized in-house coatings systems

INSITE® Coatings Services

Onsite operation and maintenance of PPG-installed coatings lines

Sustainably advantaged* options

Helping to meet sustainability goals and regulations

Efficiency and logistics

Single point of contact can lower costs and streamline operations

* Sustainably advantaged products are identified using PPG's internal methodology that validates product attributes and their contribution toward the UN Sustainable Development Goals.
