

PPG Laboratory Test Results Certification

Acid Resistance Hydrochloric And Sulfuric Acid

PPG Industries, Inc. certifies the following performance properties for the DURANAR® Coil & Extrusion Coating Systems when applied and baked on properly cleaned and pretreated substrates, according to PPG specifications:

Coatings:	DURANAR®
Test:	ASTM D1308 - Reagent 6.1.6, Procedure 7.2
Specification:	A coated panel is subjected to separate spot tests of up to 20% concentrations of hydrochloric and sulfuric acid solutions for a period up to 24 hours. The panel is then washed with distilled water, and examined for any effects of significant color change, blisters, and overall appearance.
Result:	No effect on coating.
