

Your trusted provider for outsourced
and INSITE[®] coatings services

Coatings Services

Liquid, powder, electrocoat and pretreatment

We protect and beautify the world[®]

When your customers demand parts coated with precision and uniformity, PPG helps you stand out.

PPG's coatings services business seamlessly integrates our globally trusted pretreatment, e-coat, liquid and powder products with our renowned expertise in building and managing every type of coatings application line imaginable.

Business solutions tailored to your specific needs

We focus on helping you maximize profits and efficiency while delivering the most value to your customers. We offer two distinct ways to do business, each tailored by our experienced professionals to the unique demands of your business and its customers.

Regional coating centers

We provide customized outsourced coating services for more than 900 original equipment manufacturers (OEMs), tier suppliers and parts manufacturers worldwide from conveniently located regional coating centers throughout North America and Europe.

With expertise in every type of protective coating technology, our coatings centers finish parts of every shape, size and metal substrate to your most exacting specifications with the goal of enhancing quality control and environmental compliance, while reducing your operating and overhead expenses.

INSITE® coatings systems and paint shop management

The *InSite* coatings system management program unites all the benefits of a dedicated in-house coatings system without the capital investment, environmental concerns and difficulties associated with managing one.

Our professionals not only design, build, install and operate an in-house coatings system tailored to your specific application, they manage every aspect of the coating line after it is built to meet production volumes, enhance production efficiency and improve quality control.

Or, if you have an existing coatings operation and want to enhance its profitability and performance, our paint shop management program is the right fit for you.

Used by many global OEMs and tier suppliers, this program is designed to give you the freedom to concentrate on your business's core competencies while we deliver hands-on, in-plant management of your coatings operations at a predictable, plannable fixed cost.

To help optimize your coatings investment, we supplement our core services with a range of value-added benefits, including:

- Special packaging (including aftermarket)
- Full EDI capabilities
- Labeling
- Subassembly/light assembly
- Side panel sectioning for aftermarket sheet metal
- Custom industry-standard barcoding
- Direct shipping to OEMs and end users
- Best-in-class inventory tracking system
- Real-time process monitoring and control of critical line parameters
- In-house testing with accredited A2LA performance test laboratory

Global benefits, local service

When you work with PPG, you gain access to products, services and technical know-how of one of the world's largest coatings companies combined with highly responsive local coating centers strategically located throughout the world. As a result, our coatings services business delivers a package of benefits that includes:

- Strategically located regional coatings centers near your plant or customer operations
- Combined coatings services and materials expertise under one roof
- Decades of operational and systems expertise
- Proprietary process monitoring and control system for exceptional quality and process control

By designing, building, installing and operating our own equipment, we offer the most efficient coatings operations available. To learn more about how we can help your business achieve new levels of quality, profitability and performance, call our coatings services team at **866.806.4018** or visit ppgcoatingservices.com.
