

UBS Arena Scores Big

PPG provides outstanding color matching and durability with coatings that look great and hold strong.

Case study

The Customer

New York Arena Partners

Contractor / Applicator

FCS Group, LLC is one of the largest commercial painting companies in the state of New Jersey with extensive experience in stadiums and entertainment complexes. PPG has forged a close relationship with FCS Group due to great service and a wide selection of products.

The Location

Belmont Park, NY

The Challenge

The UBS Arena was a new multi-purpose public venue that needed coatings to both stand up to heavy visitor traffic and create a pleasing aesthetic – with over 30 colors that had to be matched and tinted with precision. As the project occurred between April 2021 and November 2021, it was additionally impacted by supply shortages of key products due to the ongoing pandemic.

The Solution

FCS Group used PPG SPEEDHIDE® Interior Latex Sealer, PPG SEAL GRIP® Interior/Exterior Universal Primer/Sealer, and PPG PITT-GLAZE® Eggshell, and a Premier Authorized Dealer nearby in New York City was able to service the job to achieve the color matching. In the end, roughly 6,000 gallons of paint were used on substrates such as CMU, gypsum wallboard, and ceiling decks.

The Benefits

PPG offers a wide breadth of products to meet the needs of demanding projects and could pivot to substitute products that were of equal quality and performance for any shortages. Most products used had low to no VOC* content and offered benefits such as low odor, stain and mildew resistance, smooth finishes, and fast dry times.

The Result

A beautiful new arena opened its doors in November 2021. Having a Premier Authorized Dealer nearby helped PPG and FCS Group meet the project deadline, and the high-performance coatings will last for years to come.

PPG products are high quality, and our painters like the way they brush, roll and spray out... we know what to expect when we open a bucket of PPG Paints. We appreciate that kind of attention to detail; it makes our job easier, and that's why we choose PPG. They have been a great partner on many fast-paced, high-profile projects.

FCS Group, LLC

* Colorants added to base paints may increase VOC level significantly depending on color choice.
