# PPG QUICKLINE™ Introduction

---

**Not every bodyshop has the latest technical equipment, but all bodyshops need to be able to produce good quality paint finishes, regardless of application conditions. PPG QUICKLINE™ brand has been specifically designed to work effectively in a variety of application conditions.**

Using proven technology as the basis for the development of *PPG Quickline* brand, the technical team focused on designing robust products that make mixing simple and application easy. All leading to consistently good quality finishes.

*PPG Quickline* offers a **comprehensive toner range**, including solid toners, effect toners, metallic toners and ancillary products and reducers. This allows shops to match a wide variety of OEM colors, handle both standard and specialty finishes, and adapt to diverse repair needs.

A smart, mid-tier solution that delivers dependable performance, strong color capability, and efficient throughput — providing the right balance of quality and cost for everyday collision repair.

# PPG QUICKLINE™ Introduction

## Unleash Your Potential with Cost Effective, Quality Refinishing Solutions

Our comprehensive product lineup offers a full spectrum of solutions designed to meet the diverse needs of quality-driven collision centers. This refinish system delivers mid-tier industry leading color matching, dependable durability, and application flexibility — all at a competitive price — giving you the tools to achieve good results, every time.

### SEALERS

Developed to improve adhesion and topcoat coverage before applying the basecoat color. Various shades of G1 – G7 gray can be achieved by combining QS-3400, QS-3500 and QS-3600 in different proportions, which may optimize topcoat consumption and the total repair process time.

### BASECOATS

Waterborne basecoats that offer ease of use, fast drying times, and great coverage, particularly with multi-stage and pearl effect colors. As a waterborne system, it delivers a more environmentally friendly solution with reduced VOC emissions — making it a responsible choice for shops looking to meet increasingly strict environmental regulations without compromising on quality. Delivers high-quality results while also enhancing productivity in the painting process.

### CLEARCOATS

The clearcoat range includes a glamour clear for premium, high-gloss finishes and a speed clear designed for fast turnaround times, ensuring the right solution for every job. Suitable for any size repair, these versatile clearcoats offer flexible drying options allowing painters to choose the most efficient method based on their specific needs and shop conditions.

## Key Advantages

### COLOR CAPABILITIES

- Quality color matching capability at an affordable price, ensuring a flawless finish that seamlessly blends with the original vehicle color
- Toners include a range of opaque, and highly chromatic options to match today's OE color palette, enhancing productivity through time-saving features and increased throughput
- Basecoat achieves match in two to three coats, including translucent colors when spectral gray sealer is used

### COST SAVINGS

- Unsurpassed four-year shelf life on unopened toners
- Includes PPG DIGIMATCH™ camera and PPG LINQ™ 2D Preview color software which will save time during the color matching process to get the right color match the first time

### PRODUCTIVITY

- Metallics achieve correct orientation, no mottling
- Quick flash times
- Easier, more efficient blend process
- Fast clearcoat force dry times as little as 15 minutes
- Anti-settle technology minimizes pigment separation and reduces the need for excessive agitation, ensuring consistent color accuracy straight from the can and helping shops work faster and more efficiently.

# PPG QUICKLINE™ Toners

## SOLID TONERS

CODE	DESCRIPTION
QT-6000/2L	White
QT-6002/HL	Pale White
QT-6003/HL	Ultra Fine White
QT-6050/HL	Pale Black
QT-6051/HL	Graphite Black
QT-6052/1L	Permanent Black
QT-6053/2L	Jet Black
QT-6054/2L	Strong Black
QT-6103/1L	Sky Blue
QT-6104/1L	Azure Blue
QT-6105/1L	Marine Blue
QT-6106/1L	Midnight Blue
QT-6107/HL	Pale Blue

# Resources and Support

---

## Industry-Leading Business Performance

Our MVP Business Solutions team provides the industry's most comprehensive set of training, tools and services to instill the knowledge our customers require to continuously improve the performance and profitability of their collision repair businesses.

## Process Improvement Training

The centerpiece of the MVP curriculum for improving cycle time performance is our Lean for Collision program. It covers such teachings as the practical application of Lean Six Sigma tailored for collision repair, 5S workplace organization, improving paint shop throughput and our exclusive X-RAY REPAIR PLANNING® course.

## Business Courses

Tapping the real-world expertise of MVP certified instructors, these courses are grouped by five key areas of running a collision repair business:

- Administration
- Production
- Financial Management
- Sales & Marketing
- Leadership

## On-Demand Learning

The PPG KNOWLEDGE COLLEGE® online learning system provides on-demand access to a wealth of cost-effective courses allowing owners, managers and key personnel to study at their own pace, whenever time permits. Examples of topics covered:

- Financial training: organizing, managing, and improving profitability.
- Parts department: parts mirroring and how to best identify, source and locate parts.
- Paint operation: how to create a predictable paint shop process and optimize paint booth productivity.
- Estimating: a range of estimating topics include fundamentals, OE repair for welded-on panels, system procedures, and more.

## MVP Conferences

Scheduled once a year in a sunny resort atmosphere, this well-attended, 3-day conference offers the opportunity to hear from experts on a unique mix of topics, as well as network with other collision repair business owners, managers, industry experts and suppliers.

Visit [PPGMVP.COM](http://PPGMVP.COM) to learn more

## Certification Training

A new user of the PPG Quickline system can complete a training at a PPG Business Development Center or at various field locations across North America. The 2-day, in-person course consists of classroom and hands-on training.

## Local Technical Support

PPG's knowledgeable territory managers and well-trained distributor technical reps are always on hand to troubleshoot any paint issues that may arise, as well as provide assistance in maximizing the efficiency and quality work of the paint operation.

## Online Learning

The training section of [ppgrefinish.com](http://ppgrefinish.com) offers a host of online learning opportunities for both new and experienced painters, so they can study at their own pace and preferred time. For example, there are many short, easy-to-follow videos on standard operating procedures (SOPs) covering the refinishing process— from prepping plastic parts and light body repair to basecoat blending and clearcoat application. There are also video tutorials on repairing complex finishes like Mazda 46G Machine Gray and other highly chromatic, translucent OEM finishes.

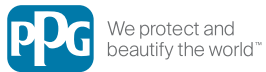

## Customer Service

Call PPG's hotline number at 800-647-6050. Our team stands ready to answer inquiries, covering a full range of product usage, applications and color-formula related issues.

## Advanced Instructor-Based Training

A variety of advanced technical courses are scheduled at PPG Business Development Centers. They cover such topics as color theory, multi-stage, special finishes, application processes and more.
