

Surface-mounted raised pavement markers

Model C80 Raised Pavement Markers
B10 Non-Reflective Traffic Buttons

Essential to roadway safety

Since creating the first pavement marker more than 45 years ago, ENNIS-FLINT[®] by PPG STIMSONITE[®] markers have led the industry in product innovation, quality, value and service.

Model C80 raised pavement markers improve delineation and increase preview time, particularly under wet conditions. Multiple B10 non-reflective traffic buttons can be interspersed between each C80 marker, helping to define the lane line and prove an audible warning of lane drifting.

Design

Model C80 markers available in white, yellow, red, blue, green and fluorescent orange, with one-way and two-way same-color or different-color lenses available

B10 buttons made of tough, durable ABS polymer

Installation

Markers and buttons can be applied using epoxy, bitumen or preformed thermoplastic

Bottoms of markers and buttons ensure aggressive grip to the roadway

Driver Safety

Long-lasting durability, adhesion, abrasion resistance and advanced optics drivers can depend on

Markers have been shown to decrease crash rates on highways by approximately 0.5 crashed per million vehicle miles

Compliance/Certification

Initial Specific Intensity (SI) values of markers engineered to at least double ASTM standards
Facility is ISO 9001:2015 certified for the design, development and manufacturing of raised pavement markers

WARNING: Certain colors of this product may contain chemicals known to the State of California to cause cancer and/or reproductive harm. For more information go to P65Warnings.ca.gov.
