

# PPG's Aerospace Academy

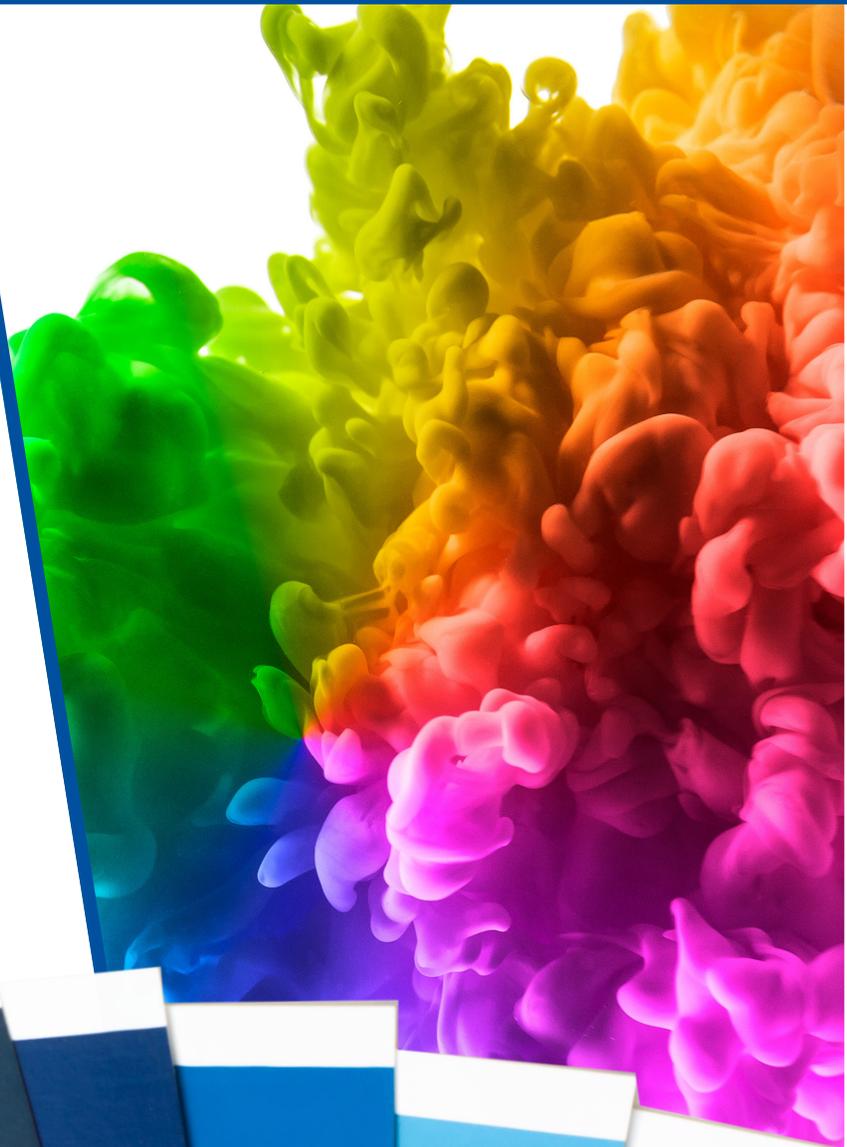

# PPG's Aerospace Academy

Combining both classroom and hands-on training, PPG's Aerospace Academy is the best tool to learn everything you need to know about aerospace coatings technologies.

**In our classroom** - new technologies and product features are highlighted.

**In our spray booth** - hands-on allows you to learn proper preparation and practice the best application techniques.

# What does the PPG Aerospace Academy bring to you?

Our training is a core pillar to enhance your team's background and expertise. The training program is accessible around the globe. That means that your teams can be trained on the same content wherever they are based.

Stay ahead of the curve and bring best practices back to the job. Learn, network and share tips with colleagues whether you're in the paint shop, an engineer or in procurement.

## Benefits include:

- Keeping up with the latest aerospace technologies
- Learning best application techniques
- Getting up to speed as a new painter
- Avoiding costly repairs
- Understanding coatings and how paints should function
- Increasing networking and sharing tips

# What our customers are saying

“

“All the instructors have been very knowledgeable.”

**Randy Weber,**  
**Technical Sales – Cooper Color**

“And they’re watching over your shoulder and letting you know if you’re correctly doing the process. This is nothing like we ever had before.”

**Brian Field,**  
**Paint Supervisor - American Airlines**

“We’re learning about the new products, the innovative solutions they’ve come out with, and how to change your process up a little bit to get a better result. It’s all very good for me.”

**TJ Bailey,**  
**Paint Supervisor - Dassault**

“It’s a very good occasion to exchange and share their experiences.”

**Christophe Colin,**  
**Material Expert - Air France**

”

# Training sessions

PPG develops and manufactures high technology aerospace products, addressing customers' present and future requirements.
