

Liquid Coatings

Quality Approved Coater List

Liquid Coating Technologies for Industrial Use:
PPG Xylan® and PPG Xylar®

About this guide

PPG delivers global coating solutions to address growing OEM, end users' and owner/operator coating specification requirements.

The Quality Approved Coater program has separate classifications for fastener and tooling applicators, which qualifies trusted applicators that can achieve the expected high standard of PPG Xylan® and PPG Xylar® product application. PPG recognizes the commitment coaters undertake proper processes, to possess appropriate equipment, and the application skills needed to produce quality Xylan and Xylar coated components.

These coaters continually invest in personnel and training, to ensure they have fully capable applicators who understand the coating process; from part handling and preparation, to coating application and testing

The program consists of coaters that meet both PPG and the needs of other stakeholders, with entrance to the program being strictly controlled.

PPG QUALITY APPROVED COATER PROGRAM (FASTENER CLASSIFICATION) - ACCREDITED COATERS

QAC ID NO.	COMPANY NAME	LOCATION	SYSTEM NUMBERS ^{*1}							IN TRANSITION PHASE ^{*2}	GENERAL ENQUIRY EMAIL ADDRESS
			1A	2A1	2A2	2B	2C	2D	3A
