

# Your trusted provider for outsourced and INSITE® coatings services

## Coatings Services

Liquid, powder, electrocoat and pretreatment

We protect and  
beautify the world®

# When your customers demand parts coated with precision and uniformity, PPG helps you stand out.

PPG's coatings services business builds on the combined experience of the MetoKote Corporation and The Crown Group. With over 100 years of tradition and excellence between them, they combine the high-performance liquid, powder and e-coat protective coatings you expect from PPG with the industry-leading application services you've come to know and trust.

## Business solutions tailored to your specific needs

We focus on helping you maximize profits and efficiency while delivering the most value to your customers. We offer three distinct programs, each tailored by our experienced professionals to the unique demands of your business and its customers.

### Regional coating centers

We provide customized outsourced coating services for more than 900 original equipment manufacturers (OEMs), tier suppliers and parts manufacturers worldwide from conveniently located regional coating centers throughout North America and Europe.

With expertise in every type of protective coating technology, our coating centers finish parts of every shape, size and metal substrate to your most exacting specifications with the goal of enhancing quality control and environmental compliance, while reducing your operating and overhead expenses.

### *InSite* turnkey coatings systems and management

The *InSite* coatings system management program by PPG unites all the benefits of a dedicated in-house coatings system without the capital investment, environmental concerns and difficulties associated with managing one.

Our professionals not only design, build, install and operate an inhouse coatings system tailored to your specific application, they manage every aspect of the coating line after it is built to justify production volumes, enhance production efficiency and improve quality control.

### Paint shop management

If you have an existing coatings operation and want to enhance its profitability and performance, our paint shop management program is the right fit for you.

Used by many global OEMs and tier suppliers, this program is designed by PPG to give you the freedom to concentrate on your business's core competencies while we deliver hands-on, inplant management of your coatings operations at a predictable, plannable fixed cost.

**To help optimize your coatings investment, we supplement our three core services with a range of value-added benefits, including:**

- Special packaging (including aftermarket)
- Full EDI capabilities
- Labeling
- Subassembly/light assembly
- Side panel sectioning for aftermarket sheet metal
- Custom industry-standard barcoding
- Direct shipping to OEMs and end users
- Best-in-class inventory tracking system
- Real-time process monitoring and control of critical line parameters
- In-house testing with accredited A2LA performance test laboratory

## Global benefits, local service

When you work with PPG, you gain access to products, services and technical know-how of one of the world's largest coatings companies combined with the highly responsive local service model that MetoKote and The Crown Group have been building for decades. As a result, our coatings services business delivers a package of benefits that includes:

- Strategically located regional coatings centers near your plant or customer operations
- Combined coatings services and materials expertise under one roof
- Over a century of combined operational and systems expertise
- Proprietary process monitoring and control system for exceptional quality and process control

By designing, building, installing and operating our own equipment, we offer the most efficient coatings operations available, from the company selected as the #1 Top Shop by PRODUCTS FINISHING® magazine in a benchmark survey of liquid and powder coatings operations.

To learn more about the complete range of equipment, service and staffing solutions available from PPG, call our coatings services team at **(419) 996-7800** or visit [ppgcoatingservices.com](http://ppgcoatingservices.com).
