

# KINGFISHER CHILDREN'S BOOK CATALOGUE 2020

# WELCOME TO THE 2020 KINGFISHER CHILDREN'S CATALOGUE!

This year we are proud to publish a wonderful selection of new titles that truly reflect the breadth of contemporary children's non-fiction – from gorgeous picture-book style illustrated titles that look at the world from a fresh perspective, through hands-on, activity-driven science books, to titles packed with real-world experiences that tap into the latest trends.

If you've ever wondered how many high jumps it would take to reach the Moon\* – then help is at hand! Full of funny facts and easy-to-read, *How Many Mice Make an Elephant* introduces children to the tricky concepts of size and distance.

Kingfisher has sold over 3 million Basher books, and now Basher brings STEM – that's Science, Technology, Engineering and Maths – to life in his unique way for young scientists, with *Basher STEM Junior*. The series explains how we meet STEM in our everyday lives and brings the great scientists of history to life.

*Ultimate Gamer: Career Mode* introduces kids to a host of careers in the gaming industry, from how to become a top game developer to making a living by live-streaming games on Twitch and YouTube, through finding out what it takes to be a pro-gamer competing in eSports tournaments around the world.

Fans of the world's most popular computer game can get ahead of the pack with *Everything You Need to Master Minecraft Earth*, the essential guide to the Augmented Reality spin-off that will bring Minecraft into our world in 2020.

With Fatti Burke's eye-catching illustrations, *Wings* is a wonderful journey of discovery, taking readers on a fact-packed flight over a fascinating subject. There's easy-to-read information on wings of all kinds from first aeroplanes to fire-breathing dragons, including plenty of STEM material.

For kids who are keen to put their science know-how into action, our four new eco-themed *Discover It Yourself* titles are full of practical experiments for budding scientists to try at home, plus inspiring ideas on how to make our environment a cleaner, safer place.

Last and by no means least, we bring you *Wow! Robots* and *Wow! Forests*, the latest additions to a wonderfully bright and inviting series that pairs gorgeous, contemporary illustrations with incredible facts.

Thank you!

Russell McLean  
Kingfisher Publisher

\* Answer:

157,142,857 high jumps would reach the Moon

**Ultimate Gamer**
