# ACCEPTANCE AND COMMITMENT THERAPY (ACT) FOR LONG-TERM PHYSICAL HEALTH CONDITIONS GROUP

How can we achieve the highest quality of life despite the physical symptoms and limitations of living with a long-term condition?

ACT Therapy focuses on helping you live a rich and meaningful life, whilst learning new ways of approaching difficult thoughts and feelings. You can learn how to release from the struggles you face and be the person you want to be, despite life's difficulties.

ACT, a form of Cognitive Behavioural Therapy, differs in its approach on some elements such as managing difficult thoughts. Some clients find that ACT therapy is more suitable for their needs.

## What to expect in the sessions

The group is made up of 8-10 sessions, with each lasting around 1.5 hours. We allow time for you to take a break and move around during the session, if needed.

This group nurtures a relaxed and informal atmosphere to make everyone feel safe. While there is no pressure to share personal experiences, participants are encouraged to actively engage in group discussions and exercises.

Sessions will include a mix of presentations, group exercises, and group discussions. You'll also take away ideas on how to practice your therapy skills away from the sessions.

## Who will benefit

- Anyone with a long-term physical health condition/s who wants to further explore how this diagnosis impacts their mental health and /or how their mental health impacts their physical health
- Those with an open mind and willingness to make changes and try new ideas between sessions

## Session breakdown

1. What is Acceptance and Commitment Therapy? Introducing Mindfulness
2. Values
3. Unhooking from difficult thoughts and feelings
4. Unhooking part 2
5. Reality gaps. Feelings of grief. Making room for feelings.
6. Self compassion (kindness)
7. Goal setting, problem solving
8. Bringing it all together

## Additional considerations

Individual physical safety is our priority and its important to attend all 8 sessions.

This group is for those who are not currently experiencing ongoing acute crisis in their conditions, such as planned surgery or hospital admissions.
