What is the aim of the fund?

The aim of the fund is to support local hockey delivery that engages new participants within the sport through the club and community networks. The fund will:

- Enable clubs and organisations to deliver new hockey opportunities locally
- Reach new audiences who don't currently engage with hockey
- Deliver hockey in new environments, extending the sport's traditional reach
- Use hockey to increase physical activity among communities and individuals locally

With England set to host EuroChamps27 next summer, England Hockey has launched its Social Impact Plan including a range of national initiatives which will use hockey as a force for social change, growing the sport's reach and championing greater diversity among those who play it. The fund itself will compliment this work, as well as being part of the long-term strategy to support clubs and communities in developing hockey engagement.

The key target participants are:

- Youth - State Schools that currently do not deliver hockey within curriculum or extra-curricular through after-school clubs
- Disabilities - People with Disabilities, Impairments or Long-term Health Conditions
- Community - People from Low Income Households and ethnically Diverse Communities
