

FREE PROSTATE CANCER TESTING DAY

Saturday 14th March

11am – 3pm

Prostate Cancer is the most common cancer among men in the UK, killing more than 12,000 men each year.

Early stage prostate cancer is usually symptomless. Caught early, it is usually curable. The only way of detecting prostate cancer early enough is to have a simple PSA blood test.

The Prostate Project charity is offering a limited number of free PSA blood tests.

Book your free test NOW
