

Community of Practice	Short Description	Lead Coordinator	Co-Lead Coordinator	Members
Permahaven Research Group (PRG)	The Permahaven Research Group (PRG) advances sustainability education through applied, experiential learning in permaculture-oriented urban gardens. These living laboratories connect students, staff, and community members across Aurora universities and public spaces, translating sustainability theory into collaborative practice. By working in shared gardens, participants address real ecological and social challenges while learning with and from diverse age groups and communities, fostering social capital, civic engagement, and societal change-making. PRG activities exemplify Aurora's values of collaboration, sustainability, and societal impact by creating cross-institutional learning spaces that extend beyond classrooms into local communities. The gardens function as hubs for peer learning, experimentation, and innovation, enabling participants to co-develop practical responses to environmental and social issues. Impact is evidenced by growing participation across institutions, sustained community involvement, and the publication of an academic book documenting the process and lessons of developing a university-based permaculture garden as a transferable model for experiential sustainability education.	Isabel Fróes Copenhagen Business School Senior Advisor ifr.msc@cbs.dk	Léa Chambaudet UPEC Sustainable Development and Social Responsibility Officer and PhD student lea.chambaudet@u-pec.fr	Maribel Blasco, Copenhagen Business School, Associate Professor, mbi.msc@cbs.dk Albina Dioba, Copenhagen Business School, PostDoc Researcher, aldi.msc@cbs.dk Lolila Rubens, UPEC, Full Professor, lolita.rubens@u-pec.fr Begoña Alonso Fernandez, UPEC, Associate Professor, begona.alonso-fernandez@u-pec.fr Ramon Rispoli, UNINA, Associate Professor, ramonrispoli@gmail.com Benedetta Toledo, UNINA, PhD student, benedettatoledo@gmail.com Nunzia Ambrosio, UNINA, PhD Student, nuntia.a@gmail.com

Peace in Practice Across Universities	This Community of Practice brings together Aurora partners to co-create research, teaching, and engagement on peace and global citizenship. Guided by an inclusive, consultative governance model, Dr. Marije Luitjens leads with co-leads Oleksandr Khyzhniak and Selma Porobic, jointly shaping the annual programme and agenda. We meet in person when Aurora events allow, including the 2025 Aurora Peace Conference and the 2026 Symposium on Global Citizenship, and maintain regular online meetings, such as for the upcoming Convention. Our work reflects Aurora values: collaboration through co-designed learning modules, shared case studies, and exchanges of staff and students, including guest lectures (e.g., Dr. Luitjens in March); societal change-making via policy dialogues, public seminars, and student challenge labs on conflict, democratic participation, and intercultural understanding, research and exchange on peace education; and sustainability by linking peacebuilding to social resilience and responsible futures. This year we will host internal workshops, joint research seminars, and teaching activities involving Aurora colleagues and students, aligned with the VU Rector Magnificus' Peace Agenda and the UNESCO Chairs, reinforcing shared European peace priorities and long-term cooperation.	Marije Luitjens Vrije Universiteit Amsterdam Assistant Professor of Peace Studies and IR m.r.luitjens@vu.nl	Oleksandr Khyzhniak / Selma Porobic Vrije Universiteit / UPOL Project Manager Aurora / Aurora IC and peace scholar o.khyzhniak@vu.nl / selma.porobic@upol.cz	VU Prof. dr. Supporting Doctoral Researchers and Supervisors	Guided by the core Aurora value of Collaboration, this proposed Community of Practice will leverage the Aurora Universities' collective expertise in supporting the professional development of doctoral researchers and their supervisors.	Toby Erik Wikström University of Iceland Project Manager, the Graduate School & Research Assistant Professor, Faculty of Languages and Cultures Aurora: Member WP2	Marie Jadrníčková Palacký University Olomouc Aurora Research Officer Aurora: Co-Lead TT 5.2, Member TT 10.2, Member ARC Office marie.jadrnickova@upol.cz	Simon Kresmann, Head of Graduate Center Plus (central early career support), Universität Duisburg-Essen, simon.kresmann@uni-due.de Gunna Weingartner, Office of Vice Rector for Research (Career Development), Universität Innsbruck Aurora: Member TT 5.1 and TT 5.2, gundula.weingartner@uibk.ac.at

	Open to all Aurora academic and administrative staff supporting doctoral education, the CoP will organize at least one event per year to exchange best practices and explore possibilities for greater cooperation within the network such as professional development workshops and supervisor trainings. In doing so, the CoP could help lay the groundwork for a possible work package on support for doctoral researchers and supervisors within an eventual new Erasmus+ bid, should Aurora decide to go in that direction.	tew@hi.is		M. The seizmic Community of Practice: Social Entrepreneurship Education, Impact Competencies, and Systemic Change	The seizmic Community of Practice brings together academics, doctoral researchers, students, and professional staff working on social entrepreneurship education, impact competencies, and system-level change across Aurora universities. Building on the seizmic ecosystem (short-term mobility courses, digital learning tools, learning experience monitoring, student awards, and the doctoral network), the CoP provides a shared space for mutual learning, experimentation, and reflection on how social entrepreneurship competencies are taught, assessed, and translated into societal impact. The CoP explicitly advances Aurora values by fostering deep cross-institutional collaboration, developing educational practices that address grand societal challenges, and promoting sustainability-oriented entrepreneurship education. Rather than focusing on project delivery, the CoP centres on shared professional practice: designing, testing, comparing, and refining pedagogical, digital, and evaluative approaches to social entrepreneurship education within and beyond Aurora.	Kai Hockerts Copenhagen Business School (CBS) Professor of Social Entrepreneurship and Corporate Sustainability kho.msc@cbs.dk	Ramon Rispoli Università degli Studi di Napoli Federico II (UNINA) Associate Professor (Social Entrepreneurship / Innovation) ramonrispoli@gmail.com	1. Co-Creating Global Education: The Aurora Internationalisation of the Curriculum CoP	Internationalisation of the Curriculum (IoC) is an educational approach that integrates global perspectives, intercultural understanding, and transnational competence into the design, delivery, and assessment of teaching and learning. (Leask, 2015). “The potential benefits of IoC, (are addressed) especially towards making internationalisation more sustainable and relevant. IoC intends to facilitate a shift from the narrow focus of internationalisation on mobility to learning and the curriculum, which ideally can engage all students in critical conversations about local and global issues (Leask, 2015; Whitsed et al., 2024).” This CoP is integrated by academics, educational developers, internationalisation experts and Aurora students. The IoC CoP intends to identify and propose solutions to the challenges we face, as well as to share, enhance, and better disseminate the good practices and opportunities that can help us fully embed IoC into Aurora 2030 teaching and learning practices, for both current and future joint projects, collaborative teaching, and research.	Marina Vives Cabré Universitat Rovira i Virgili, Tarragona Internationalisation projects officer, Aurora WP8 lead marina.vives@urv.cat	Vít Zouhar Palacký University Olomouc Vice-Dean for Accreditation, Practical Training, and Continuing Education at the Faculty of Education vít.zouhar@upol.cz	Simona Gíbalová (UPJS). INSIGHTS	The Community of Practice INSIGHTS unites the University of Naples Federico II, the University of Innsbruck, and the Universitat Rovira i Virgili around the characterization and exploitation of insect-derived materials as ingredients for food, feed, and as tools for sustainable agricultural production and crop protection. The partners integrate expertise in optimization of insect cultivation, insect microbiome analysis, insect frass valorization for crop production and protection, and molecular bioactivity of insect-based foods in human health. Anchored in the Aurora values of Collaboration and Sustainability, our CoP will on one side facilitate knowledge exchange and joint learning and dissemination initiatives across member universities. On the other, complementary, side, by consolidating interdisciplinary strengths, INSIGHTS will provide a platform to foster an interconnected, innovation-driven research space aimed at increasing the sustainability of agriculture and the food production system. The activities of our CoP will be documented through workshops, seminars, peer-learning sessions and collaborative publications. LOUIS: Learning Outcomes in University for Impact on Society	LOUIS focuses on the students' development of transversal competences as part of their university studies. LOUIS offers a tool and language to articulate what competences teachers want students to develop and to describe desired or demonstrated performance in these competences. The LOUIS community of practice is a group of teachers using the LOUIS tool and helping each other and new entrants to improve their teaching and their students' learning. LOUIS has active groups in majority of Aurora universities (UIBK, Ulce, UPOL, UDE, UNINA, VU), and individual members at remaining universities (CBS, URV, UPEC); it organizes training sessions as part of larger Aurora events and stand-alone Blended Intensive Programmes (i.e. BIPs). LOUIS works in the core of the Aurora vision of matching academic excellence with societal relevance and the Aurora mission to ensure that Aurora graduates have both the ability and the mindset to help address societal challenges. Low-Dimensional Materials for Advanced (Bio)Sensing	This Community of Practice (CoP) focuses on low-dimensional materials, with emphasis on two-dimensional (2D) systems such as MXenes for advanced (bio)sensing applications. The emerging class of MXenes, including $Ti_3C_2T_x$, exhibits high electrical conductivity, hydrophilicity, and tunable surface chemistry, making it highly suitable for next-generation (bio)sensing platforms. The CoP aims to establish a structured and sustainable collaboration among Aurora universities in the synthesis, characterization, functionalization, and integration of 2D materials into electrochemical and hybrid sensing devices. It promotes interdisciplinary cooperation among materials scientists, chemists, physicists, engineers, and bioelectronics researchers. By sharing expertise, research infrastructures, and methodologies, the CoP strengthens research capacity within Aurora, fosters mobility and joint initiatives, and contributes to societal change through accessible and sustainable sensing technologies for healthcare, food safety, and environmental monitoring. The CoP supports long-term transnational collaboration fully aligned with Aurora values.	Vincenzo Iannotti University of Naples Federico II Professor viannotti@unina.it	Ulf Wiedwald Universität Duisburg-Essen Professor ulf.wiedwald@uni-due.de	Vincenzo Iannotti, University of Naples Federico II, Professor, viannotti@unina.it; Ulf Wiedwald, Universität Duisburg-Essen, Professor, ulf.wiedwald@uni-due.de; [Name to be confirmed], [Aurora University], [Position], [Email] – A third Aurora partner has formally agreed to join the CoP, and administrative confirmation is in progress.
Aurora Research Support	The establishment of a Community of Practice (CoP) addresses this gap by providing a sustainable framework for ongoing cooperation. Its primary aim is to build on existing trust, knowledge, and experience to strengthen support for	Svandís Helga Halldórsdóttir University of Iceland Head of Grants Office svandish@hi.is	Andreas Hoene / Marie Jadrnickova UDE / UP Research Officer marie.jadrnickova@upol.cz / andreas.hoene@uni-due.de	Dejan Lukovic <dejan.lukovic@uibk.ac.at>

	researcher communities and foster research synergies across Aurora universities. To achieve this, the CoP will focus on practical collaboration activities, including matchmaking, sharing funding and partnership opportunities, and further development of the Aurora Research Support Platform. The group will meet at least once a year onsite, complemented by additional online meetings depending on the scope of activities. In parallel, the CoP will contribute to the recognition and professionalisation of research management, in alignment with the European Research Area (ERA) Action on Research Management, in which Aurora is actively engaged through participation in the Core Group.

South-South and Triangular Cooperation on Food Systems and Climate Change (SSTC- FSCC)	South-South and Triangular Cooperation on Food Systems and Climate Change (SSTC-FSCC) is a university-led, multi-stakeholder Community of Practice (CoP) focused on addressing the complex societal challenges related to food systems, climate change and linked topics. The primary focus of this collaboration is to advance evidence-based higher education and inter- and trans-disciplinary research, with the aim of contributing to the transformation towards sustainable, resilient and just food systems. Initially established informally in 2021 following an exploratory assignment commissioned by the Food and Agriculture Organization of the United Nations (FAO) to VU Amsterdam, the SSTC-FSCC CoP has expanded progressively in terms of geographic coverage (28 members over 17 countries), thematic areas (e.g. health and social entrepreneurship, futures and foresight), and member typology (incl. industry/private sector, Agricultural Knowledge and Innovation Systems as well as research and innovation organisations). The SSTC-FSCC CoP promotes mutual learning, knowledge co-creation and the inclusion of diverse knowledge systems. Within the framework of Aurora 2030, this CoP conducts activities under T4.3 South-South and Triangular Cooperation in research and education. This task enables Aurora to extend its outreach beyond the traditional Euro-American axis and to act as a bridge for building sustainable and mutually beneficial partnerships among universities across	(1) Denyse Snelder (2) Sabina Di Prima VU Amsterdam Aurora 2030 T4.3 co-leads / coordinators international cooperation projects; (1) CIS Director/ Sustainable land and water management specialist; (2) Sustainable food system specialist (1) d.snelder@vu.nl (2) sabina.diprima@vu.nl	Felipe Koch Université Paris-Est Créteil (UPEC) Aurora 2030 T4.3 co-lead; UNESCO Chairholder; AEI International School (UPEC) Vice-Dean and Head of Graduate Studies; Associate Professor in Societal Innovation – Futures Studies felipe.koch@u-pec.fr	EUROPE (*Aurora universities) * VU Amsterdam (VU, Netherlands): Denyse Snelder, Sabina Di Prima, Colette Gerards, Mekky Zaidi, Lia van Wesenbeeck, Ben Sonneveld, Marjolein Zweekhorst, * Université Paris-Est Créteil (UPEC, France): Felipe Koch * Rovira i Virgili University (URV, Spain): Marina Vives Cabré, Montse Ferrando Cogollos, Carme Güell Saperas, Mayreli Ortiz Rodríguez * University of Naples Federico II (UNINA, Italy): Ramon Rispoli, Valentina Alcade Gomez * Palacký University Olomouc (UPOL, Czech Republic): Lukas Spichal, Jana Kholová * University of Innsbruck (UIBK, Austria): Rike Stotten, Markus Schermer, Willi Bauer - University of Ljubljana (IRI-UL, Slovenia): Gregor Cerinšek, Tamara Smolej - International Centre for Advanced Mediterranean Agronomic Studies (CIHEAM-IAMB, Italy): Maroun El Moujabber, Nouredin Driouech, Virginia Belsanti - E-science European infrastructure for biodiversity and ecosystem research (LWERIC, Spain): Iria Soto Embodas, Jose Manuel Avila - Association of Commonwealth Universities (ACU, UK): Beate Knight, Linsey Simkin AFRICA
