

Amundi Global ESG Ecology Equity Fund & Amundi Multi-Asset Sustainable Future Fund

December 2022

New regulations come into effect on 1 January 2023. These regulations relate to how funds can be categorised in relation to their sustainability, with funds categorised as follows:

- **Article 9** being the most sustainable funds, having a sustainable investment as their objective.
- **Article 8** being less sustainable but promoting, among other characteristics, environmental and social characteristics.
- **Article 6** covers funds which do not integrate any kind of sustainability into the investment process.

This note is to inform you about the decision of Amundi to update the SFDR classification of the following funds:

- Amundi Global ESG Ecology Equity Fund
- Amundi Multi-Asset Sustainable Future Fund

As a result, as of **2 January 2023**, the classification of the above funds will be updated from “Article 9” to “Article 8” under the SFDR.

The objectives of the funds will be adapted by Amundi to reflect the promotion of environmental, and/or social characteristics within the meaning of Article 8 of the SFDR and will no longer refer to sustainable investments related to Article 9 of the SFDR.

This reclassification does not involve any change in the investment strategies and the other ESG characteristics or current features of these funds and has therefore no impact on their portfolios or their risk profiles.

If you would like any further information, please speak to your financial broker or advisor.
