

# Quarterly Report Q2 2025 **Irish Life MAPS<sup>®</sup>**

The Irish Life Multi Asset Portfolio Funds (MAPS) are available on a range of products provided by Irish Life Assurance and are managed by our investment manager, Irish Life Investment Managers (ILIM).

MAPS funds qualify as 'Article 8' under the Sustainable Finance Disclosure Regulation (SFDR).

Helping people build  
better futures

# WELCOME

At Irish Life Assurance, we understand that our customers' financial objectives and attitudes to risk are personal to their circumstances. We worked closely with Irish Life Investment Managers, our award-winning appointed investment managers, to create our Multi-Asset Portfolios (MAPS), which cater to different risk profiles. The funds are suitable for longer-term investors and are rebalanced every quarter to ensure alignment with risk preferences. MAPS can be accessed via our pension, investment and savings plans.

- > This update discusses key themes driving markets in the second quarter of 2025 and highlights how each of the funds performed.
- > We also explain the asset mix within each fund and outline how ILIM manages risk across the range.

ILIM is a signatory of the UN supported Principles for Responsible Investments. We manage the assets entrusted to us by our clients responsibly, with the objective of delivering longer term sustainable returns.

MAPS funds qualify as 'Article 8' under the Sustainable Finance Disclosure Regulation (SFDR). For more on ILIM's investment approach see [www.ilim.com/responsible-investing](http://www.ilim.com/responsible-investing)

**Warning: If you invest in this product you may lose some or all of the money you invest.**

# Market and Irish Life MAPS<sup>®</sup> Overview

Helping people build  
better futures

# MARKET SUMMARY AND IRISH LIFE MAPS® FUND PERFORMANCE

Global equities recovered from heavy losses following the “Liberation Day” shock as trade tensions and recession fears eased. Government bond returns were also positive due to falling bond yields, with the European Central Bank (ECB) reducing rates further in Q2.

## MAPS – AIMING TO DELIVER RISK MANAGEMENT AND SMOOTHER RETURNS OVER THE LONG TERM

Our MAPS funds are built on the belief that diversification offers investors a potentially smoother journey and that risk management aims to reduce the impact of the various ups and downs in the underlying investments. Each of our five MAPS funds invests in a range of assets, reflective of its risk profile. These include shares, bonds, property, cash and external managers/alternatives. You’ll find a full explanation of these asset classes on pages 13–20.

In the table below and on the following page, you can see the individual calendar year returns on each of the five Irish Life MAPS funds, and the annualised return over the last one, three, five and seven years as well as since launch (17 May 2013) to the end of the second quarter of 2025. Irish Life MAPS is a long-term investment – we would always advise caution when looking at fund performances over time periods of less than five years.

### Calendar Year Return

# MARKET SNAPSHOT

## Equities

Global equities, as represented by the MSCI All Country World Index (ACWI) rallied by 9.5% (2.8% in euro terms) in Q2, despite experiencing significant losses following extensive tariff announcements from the US early in the quarter.

US stocks were supported by reduced recessionary risks, improving news flow on tariffs and stabilising earnings revisions, which helped push the MSCI USA to a new historical high and a gain of 11.4% (2.5% in euro terms) over the period.

The MSCI Europe ex-UK rose by 3.6% (3.7% in euro terms).

## Bonds

The ICE BofA 5+ Year Euro Government bond index returned 2.3% as German Bund 10-year yields fell by 10bps to 2.60% amid further monetary easing by the ECB during the quarter.

European investment-grade (IG) corporate bonds returned 1.7%, with yields falling by 18bps to 3.16% while spreads narrowed by 4bps to 90bps over the period. Global high yield bonds returned 3.1% in Q2, also supported by a decline in yield of 48bps to 6.26% and spreads narrowed by 46bps to 2.32%.

**Warning: Past performance is not a reliable guide to future performance.**

# IRISH LIFE MAPS® ASSET SPLIT

There are five Irish Life MAPS funds to suit different attitudes to risk. The table below shows the strategic asset mix for each of the funds. As you can see, the lower-risk Multi Asset Portfolio 2 (MAP2) has a very high percentage in bonds and cash, which are traditionally less volatile assets. The higher-risk MAP6 is mainly invested in shares, which are traditionally more volatile than bonds or cash but have, in the past, given better long-term returns.

## Irish Life strategic MAPS asset allocation

Asset class	MAP2	MAP3	MAP4	MAP5	MAP6
Indexed Developed Market Equities	2.25%	6.00%	16.50%	37.00%	60.00%

Source: ILIM, 30 June 2025. Global Equities (DSC) use the Dynamic Share to Cash model – see page 11 for more details.

The table above shows the strategic asset mix before any Dynamic Share to Cash (DSC) or tactical movements (where applicable). ILIM rebalances the fund back to this mix on a quarterly basis. For the latest actual Irish Life MAPS fund mixes, which allow for any tactical asset allocation (TAA) or DSC changes, for example, see the relevant MAPS fund factsheet at [www.irishlife.ie](http://www.irishlife.ie).

ILIM will continue to monitor and review these assets and may change them over time.

MAPS funds qualify as “Article 8” under the Sustainable Finance Disclosure Regulation (SFDR). For more on ILIM’s investment approach, please refer to [www.ilim.com/responsible-investing](http://www.ilim.com/responsible-investing).

Among other characteristics, the Fund aims to promote environmental, social & governance characteristics, including enhanced exposure to more sustainable companies and a better alignment to the low carbon transition economy

GRESB (Global Real Estate Sustainability Benchmark) investment approach can be used alongside SFDR (Sustainable Finance Disclosure Regulations) for Property and Infrastructure funds. For more please refer to [www.ilim.com/responsible-investing](http://www.ilim.com/responsible-investing).

**Warning: Past performance is not a reliable guide to future performance.**

# Irish Life MAPS<sup>®</sup> Risk Management Strategies

Helping people build  
better futures

## IRISH LIFE MAPS® RISK MANAGEMENT STRATEGIES

### Irish Life MAPS® Diversification

As we've demonstrated, each of the Irish Life MAPS funds is diversified across a range of asset types – shares, bonds, property, cash and external managers/alternatives.

Within each of these different asset types, there is even more diversification. For example, within shares, there are allocations to Global Shares and Low Volatility Shares; within bonds, there are allocations to Corporate, Government, High Yield and Emerging Markets with comprehensive levels of diversification also seen within each of MAPS' other asset allocations.

The diversification contained in each asset class is shown in more detail on pages 13–20.

This level of diversification aims to ensure that the performance of the funds is not dependent on any one asset type, sector, geographical region, investment manager or investment style. Removing this dependence aims to produce a smoother investment journey over the longer term.

**Warning: If you invest in this product you may lose some or all of the money you invest.**

**Warning: The value of your investment may go down as well as up.**

**Warning: This fund may be affected by changes in currency exchange rates.**

### Regular Reviews

ILIM undertakes a regular review of Irish Life MAPS, evaluating the current asset and manager allocations to ensure they always represent 'ILIM's best thinking' and capabilities with respect to achieving long-term risk and performance objectives.

The process takes into account the short, medium and long-term expected outlook for investment markets, with a view to optimising the strategic asset allocation mix. Typically in these reviews, ILIM is looking for opportunities to either enhance risk management and/or increase the expected fund returns. This process involves reviewing investment opportunities such as new managers, asset classes, strategies, geographies, developments in quantitative research and simulating how best to incorporate any prospective changes into the existing funds allowing for the complexity, time, cost and benefit of doing so before then implementing the best solutions within MAPS.

## IRISH LIFE MAPS® RISK MANAGEMENT STRATEGIES

### Rebalancing

As investment managers, it's ILIM's job to ensure that the level of risk you are exposed to within MAPS is in line with the indicated risk profile for each MAPS fund, over time.

We start with this pie chart, which shows a fund with 50% in shares, 25% in bonds and 25% in other assets/external managers.

If, over the course of a year, shares grew in value by 20%, while bonds and other assets/external managers both fell in value by 10%, then, without rebalancing, the second pie chart shows the new split of the fund. Here, 57% of the fund is now invested in shares.

If the same thing happened again, we would end up with nearly two-thirds of the fund invested in shares. This fund mix may no longer be suitable for someone who originally chose an allocation of 50% in shares, 25% in bonds and 25% in cash.

This change in asset split can be avoided by regularly rebalancing the fund to ensure that it stays in line with its intended split. ILIM rebalances each of the MAPS funds on a quarterly basis, which means that each fund will not drift over time. This means that you don't have to worry about a fund becoming a higher risk rating than the one originally invested in.

**Warning: The value of your investment may go down as well as up.**

**Warning: These funds may be affected by changes in currency exchange rates.**

**Warning: If you invest in these funds you may lose some or all of the money you invest.**

**Warning: Past performance is not a reliable guide to the future performance of this investment.**

## IRISH LIFE MAPS® RISK MANAGEMENT STRATEGIES

### Dynamic Share to Cash Model

Each Irish Life MAPS fund uses the innovative DSC (Dynamic Share to Cash) model on the DSC Global Shares portion of each fund. The DSC is a quantitative model that has been developed by ILIM which uses a number of factors, across three broad categories, shown below. DSC aims to reduce the amount invested in shares and increase the amount in cash when it identifies greater potential for stock market falls. It is important to note that the DSC looks at long-term movements and trends in the market. It is not designed to react to one-off or short-term jumps or shocks.

The DSC signal was -0.54 at the end of Q1 2025 and ended Q2 2025 at -0.22. The DSC strategy started Q2 2025 with a target equity weight of 76.2%. The signal declined sharply at the beginning of April, resulting in consecutive days of de-risking to an equity weight of 59.04%. An initial re-risk took place in mid-April, before further re-risking in mid-May and a final re-risk on the first trading day of June to a traded equity weight of 88.3%, where the last traded level remained through to the end of the quarter.

The factors include:

	MARKET MOMENTUM VARIABLE	VALUATIONS	GLOBAL MACROECONOMICS
OBJECTIVE	Take account of trends in shares	Take account of long-term valuation of shares	Take account of the influence of global economics on shares
INDIVIDUAL FACTORS	Moving average crossover signal	Long-term share values Earnings quality Earnings yield Earnings revisions	Real Gross Domestic Product (GDP) growth rate Bond yield curve slope Energy price levels
Q2 2025 UPDATE	The Technical group's contribution strengthened, moving into positive territory, due to higher contributions from the Moving Average Cross and Equity Market Momentum factors.	The Fundamental group's contribution weakened owing to lower contributions from the Earnings Yield, Long Run Value and Earnings Quality factors.	The Macro group's contribution increased slightly as a result of higher contributions from the Risk Index and Energy Prices factors.
Q2 2025 INDICATOR	+	-	+

Based on how these factors move over time, DSC will decide how much of each Irish Life MAPS fund to invest in Global Shares and how much to invest in cash. ILIM will regularly monitor and review these factors.

**Warning: Past performance is not a reliable guide to future performance.**

## IRISH LIFE MAPS® RISK MANAGEMENT STRATEGIES

### Currency hedging

ILIM uses a systematic currency hedging process within the Irish Life MAPS range. The proprietary strategy aims to limit the negative impact foreign currency moves can have on investment returns.

#### STRATEGY

The strategy aims to reduce the risk of experiencing negative returns from foreign currency moves. This is achieved by hedging significant non-euro currency exposure when it is beneficial to do so.

#### HOW IT WORKS

ILIM uses a systematic approach to identify key factors (valuations, market momentum, etc) that, when combined, aim to indicate when it is beneficial to hedge foreign currency exposure.

#### KEY BENEFITS

This strategy contributes to MAPS smoother investment journey by mitigating the risk of loss which can occur from moves in foreign currency valuations.

# What does Irish Life MAPS<sup>®</sup> invest in?

## Asset Classes Explained

Helping people build  
better futures

## ASSET CLASSES EXPLAINED

### 1 SHARES

#### DSC Global Shares/Global Shares\*

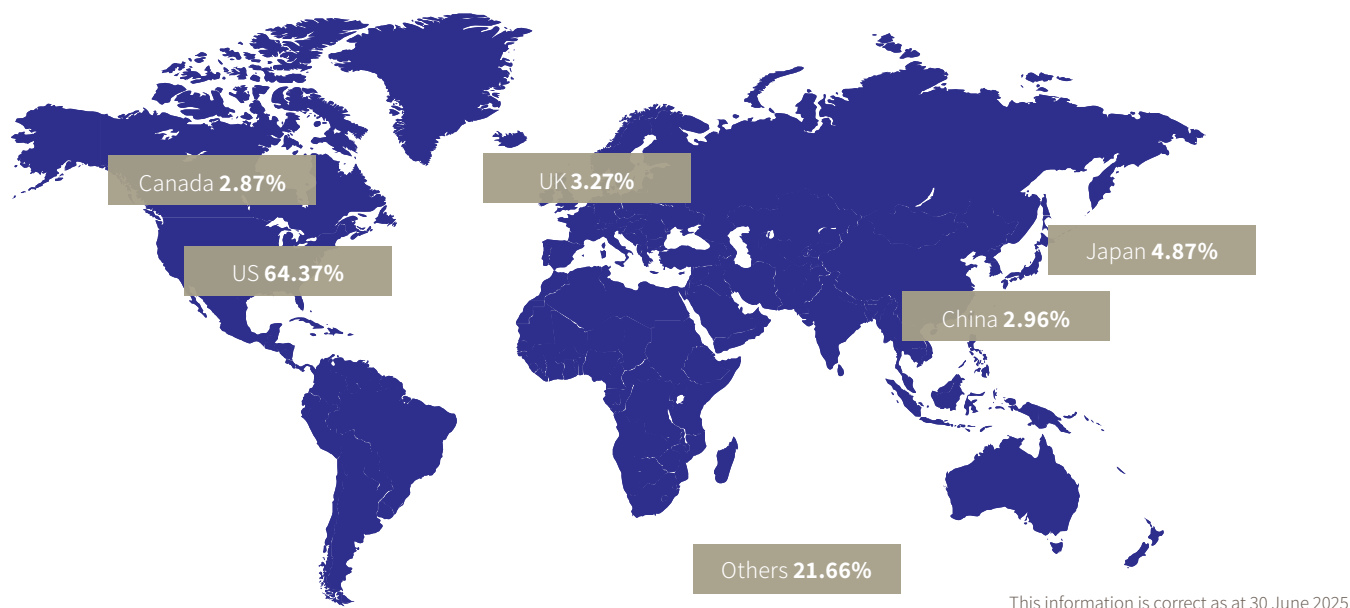

DSC Global Shares and Global Shares track the performance of a large, customised, global share index.

ILIM uses its DSC (Dynamic Share to Cash) model (explained on page 11) on the DSC Global Shares allocation while the Global Share allocation remains fully invested, providing the optimal mix for achieving MAPS objectives.

Global Shares includes c.10% in Emerging Market Shares.

For the percentage of Global Shares in each Irish Life MAPS fund, see the latest factsheet on [www.irishlife.ie](http://www.irishlife.ie).

The geographic split of the index is illustrated below:

This information is correct as at 30 June 2025

## RISK MANAGEMENT STRATEGIES

#### Global Low Volatility Shares\*

Using a detailed, quantitative strategy, ILIM chooses shares from a broad global share index which not only have shown lower volatility in the past but which are also screened for other indicators, such as value, momentum, etc. c.200 shares make up the Global Low Volatility Shares fund.

For the percentage of Low Volatility Shares in each Irish Life MAPS fund, see the latest factsheet on [www.irishlife.ie](http://www.irishlife.ie).

**Warning: The value of your investment may go down as well as up.**

**Warning: If you invest in these funds you may lose some or all of the money you invest.**

**Warning: These funds may be affected by changes in currency exchange rates.**

**Warning: Past performance is not a reliable guide to future performance.**

#### Low Volatility Shares weight compared to the global share index

Sector	Global Low Volatility
Information Technology	-5.9%
Industrials	-4.5%
Financials	-2.6%
Consumer Discretionary	-1.5%
Materials	-1.1%
Telecommunication Services	-0.3%
Energy	0.3%
Utilities	0.7%
Consumer Staples	1.8%
Real Estate	4.0%
Health Care	9.1%

## EMERGING MARKET LOW VOLATILITY SHARES

Using a detailed, quantitative strategy, ILIM chooses shares from a broad emerging markets share index which not only have shown lower volatility in the past but which are also screened for other indicators, such as value, momentum etc. c200 shares make up the Emerging Markets Low Volatility Shares fund.

Low Volatility Shares weight compared to the emerging market shares index:

Sector	EM Low Volatility
 Information Technology	-5.1%
 Industrials	0.6%
 Financials	-0.5%
 Consumer Discretionary	-4.2%
 Materials	-3.5%
 Telecommunication Services	2.2%

Sector	EM Low Volatility
 Energy	-1.1%
 Utilities	1.1%
 Consumer Staples	4.9%
 Real Estate	1.0%
 Health Care	4.7%

## Emerging Market Shares

ILIM tracks the performance of a broad emerging markets share index. Emerging Market Shares includes over 1,400 individual companies, which operate in 26 different markets across the emerging markets.

For the percentage of emerging market shares in each Irish Life MAPS fund, see the latest factsheet on [www.irishlife.ie](http://www.irishlife.ie)

The geographic split of the index is illustrated below:

"This information is correct as at 30 June 2025

## ASSET CLASSES EXPLAINED

### 2 BONDS

#### Government Bonds

- > ILIM currently tracks the performance of a recognised and leading government bond index to provide exposure to shorter-dated government bonds.
- > Within the bond allocation, ILIM chooses the proportion to invest in government bonds and has discretion in relation to the index that is tracked.

The geographic split of the index is illustrated below:

Country	Weight
Austria	3.6%
Belgium	3.0%
Croatia	0.5%
Cyprus	0.1%
Finland	1.5%
France	25.1%
Germany	21.1%
Greece	0.7%
Ireland	1.1%
Italy	21.2%
Latvia	0.2%
Lithuania	0.2%
Luxembourg	0.2%
Netherlands	4.0%
Portugal	2.1%
Slovakia	0.5%
Slovenia	0.3%
Spain	14.8%

This information is correct as at 30 June 2025.

#### Corporate Bonds

- > ILIM currently tracks the performance of a recognised and leading corporate bond index to provide exposure to corporate bonds.
- > Within the bond allocation, ILIM chooses the proportion to invest in corporate bonds and has discretion in relation to the index that is tracked.

The sector split of the index is illustrated below:

Sector	Weight
Automotive	6.4%
Banking	28.6%
Basic Industry	2.7%
Capital Goods	3.6%
Consumer Goods	6.0%
Energy	2.4%
Financial Services	7.0%
Healthcare	6.0%
Insurance	4.2%
Leisure	0.6%
Media	1.2%
Real Estate	6.5%
Retail	2.0%
Services	1.2%
Sovereign	0.2%
Technology & Electronics	2.4%
Telecommunications	5.4%
Transportation	3.6%
Utility	10.0%

This information is correct as at 30 June 2025.

**Warning: The value of your investment may go down as well as up.**

**Warning: If you invest in these funds you may lose some or all of the money you invest.**

**Warning: These funds may be affected by changes in currency exchange rates.**

## Emerging Market Bonds\*

- > ILIM currently tracks the performance of recognised and leading emerging-market bond indices, both local and hard currency (denominated in US dollars), to provide exposure to emerging-market bonds.
- > Within the bond allocation, ILIM chooses the proportion to invest in emerging-market bonds and has discretion in relation to the indices that are tracked.

The geographic split of the local currency index is illustrated below:

Country	Weight
Brazil	7.4%
Chile	1.8%
China	6.8%
Colombia	3.6%
Czech Republic	6.8%
Hungary	3.0%
Indonesia	10.0%
Mexico	10.0%
Dominican Republic	0.3%
Malaysia	10.0%
Peru	1.8%
Philippines	0.0%
Poland	9.9%
Romania	4.4%
Serbia	0.4%
Egypt	0.0%
Thailand	8.7%
Turkey	0.8%
Uruguay	0.2%
South Africa	7.4%
India	6.8%

This information is correct as at 30 June 2025.

## High Yield Bonds

- > ILIM currently tracks the performance of a recognised and leading high-yield bond index to provide exposure to emerging-market bonds.
- > The high-yield bond allocation is currently sub-advised by an external manager.

The geographic split of the index is illustrated below:

Country	Weight
United States	63.4%
United Kingdom	6.7%
France	5.6%
Canada	4.8%
Italy	4.0%
Germany	3.8%
Japan	1.6%
Netherlands	2.2%
Spain	1.8%
Sweden	1.0%
Portugal	0.6%
Greece	0.4%
Australia	0.6%
Switzerland	0.4%
Belgium	0.4%
Other	2.6%

This information is correct as at 30 June 2025.

## Global Aggregate Bond Fund

ILIM tracks the performance of a global aggregate bond index which holds both regional and global fixed income securities (bonds), including developed and emerging market investment grade bonds.

**Warning: The value of your investment may go down as well as up.**

**Warning: If you invest in these funds you may lose some or all of the money you invest.**

**Warning: These funds may be affected by changes in currency exchange rates.**

## ASSET CLASSES EXPLAINED

### 3 EXTERNAL MANAGERS/ALTERNATIVES

ILIM recognises the need to incorporate alternative strategies within the Irish Life MAPS funds. ILIM complements its own alternative strategies with an active pipeline of external and alternative managers that bring diverse performance and at the right price. The external manager/alternative allocation is monitored and adapted on an ongoing basis, as ILIM's fund managers feel appropriate to best achieve MAPS' investment objectives. ILIM monitors performance and may choose to change the allocation to external managers or the target allocation within the external manager allocation, as deemed appropriate. ILIM may also choose to replace, add or remove external managers as opportunities arise and market conditions change.

ILIM's infrastructure shares and options strategy, along with strategies from eight leading managers, are currently held within each Irish Life MAPS fund. The percentage allocated to external managers/alternatives varies for each MAP and can be found in the Asset Split section of this update or on the latest factsheet, at [www.irishlife.ie](http://www.irishlife.ie).

MAPS funds qualify as 'Article 8' under the Sustainable Finance Disclosure Regulation (SFDR). For more on ILIM's investment approach, please refer to [www.ilim.com/responsible-investing](http://www.ilim.com/responsible-investing)

## INFRASTRUCTURE AND LISTED INFRASTRUCTURE SHARES

- > ILIM invests in IFM physical infrastructure fund which invests in real assets, such as airports, toll roads, railways, ports, water, gas and many others.
- > ILIM also tracks the performance of a large global infrastructure shares index.
- > There are 100 individual company shares represented, investing in sectors such as airports, toll roads etc.
- > These infrastructure shares come mainly from developed market economies, but also some emerging markets.

For the percentage of infrastructure shares in each Irish Life MAPS fund, see the latest factsheet on [www.irishlife.ie](http://www.irishlife.ie).

The geographic split of the index is illustrated below:

This information is correct as at 30 June 2025.

## RISK MANAGEMENT STRATEGIES

### Option Strategy

- > The option strategy provides an alternative source of share market returns. It has a low correlation with the performance of global shares and therefore provides a diversified source of share-market-derived returns.
- > The option strategy currently sells 'put' options on a monthly basis. This provides downside protection if markets fall (relative to direct global share market exposure), for which the funds are paid a fee.

This information is correct as at 30 June 2025.

### Percentage split of the underlying indices on which the options are taken

## ASSET CLASSES EXPLAINED

### 4 PROPERTY\*

Each Irish Life MAPS fund currently invests in commercial property through an allocation to ILIM's Pension Property fund, in the form of offices, retail and industrial property. You can see the split between these areas and the funds' top five holdings below. More information on this part of the property allocation at the end of June 2025 is also shown below. ILIM also added extra property diversification through a small exposure to residential property via an investment in the private rented sector (PRS) and an exposure to European commercial property via ILIM's EREF European Property fund.

- 1 Cadenza
- 2 2 Grand Canal Square, Dublin
- 3 1 Georges Quay, Dublin
- 4 13-18 City Quay
- 5 70 St. Stephen's Green

The information is correct as at 30 June 2025. For the percentage of property invested in each MAP Fund, please see the factsheet on [www.irishlife.ie](http://www.irishlife.ie).
