

Research day 7-10-2022

Poster Session

Division	Researcher	Title of the Poster
Beeld en Oncologie	Atia Samim	[18F]mFBG PET-CT for detection and localisation of neuroblastoma: a prospective pilot study
Beeld en Oncologie	Eline Huele	Stereotactic body radiotherapy: and pedicle screw fixation during one hospital visit for patients with symptomatic unstable spinal metastases: the BLEND
Beeld en Oncologie	Jasmijn Westerhoff	Safety of a high-field MR-LINAC to deliver radiotherapy
Beeld en Oncologie	Dieuwke Mink- van der Molen	Umbrella honey trial: the effect of hyperbaric oxygen therapy on breast cancer patients with late radiation toxicity using a trial within cohort design
Beeld en Oncologie	Belle van Duin	Time interval from primary tumor to first distant recurrence and patients outcomes in advanced melanoma
Beeld en Oncologie	Koen Zwart	Characteristics and survival of metastatic colorectal cancer patients receiving local treatment with deficient mismatch repair versus proficient mismatch repair tumors
Beeld en Oncologie	Karel Smit	Association of skeletal muscle loss with patient-reported treatment toxicity among colon cancer patients receiving adjuvant chemotherapy
Beeld en Oncologie	Sietske van Nassau	Trends in Use and Perceptions about Triplet Chemotherapy plus Bevacizumab for Metastatic Colorectal Cancer: the flash mob EXCITE study
Hart en Longen	Lieke Numan	The predictive value of soluble suppression of tumorigenesis-2 (sST2) in patients on left ventricular assist device (LVAD) support
Hart en Longen	Saskia Weldam	De virtual reality patiënten rondleiding: Voorbereiding op een hartoperatie
Hart en Longen	Mats Vervoorn	Hemofiltration improves preservation of hearts during ex situ normothermic perfusion
Hart en Longen	Marion van Vugt	Cardiomyopathy variants in the general population
Hersenen	Maria Zwartkruis	Assessing the impact of <i>C9orf72</i> DNA methylation using CRISPR/Cas9-targeted Nanopore sequencing
Hersenen	Marte van der Horst	Polygenic risk scores in clinical practice: Minefield or opportunity for patient-centered care?
Hersenen	Amber Postma	Challenging behavior in children and adolescents with Dravet Syndrome: exploring the lived experiences of mothers

Hersenen	Nini de Boer	Metformin for antipsychotic-induced weight gain: is the weight over? MELIA study
Hersenen	Jaap Bakker	De ongemakkelijke waarheid: U bent niet sterk genoeg om de kracht van uw patiënt te werken. Laat uw patiënt lekker thuis!
Interne Geneeskunde en Dermatologie	Emily Kallen	Peach allergy across Europe and Japan: distribution of allergen sensitization patterns and predictions of severity
Interne Geneeskunde en Dermatologie	Marije Bartels	TRACER consortium: Treating hereditary anemias through stem cell research
Interne Geneeskunde en Dermatologie	Annemieke Kok	Feasibility of a supervised and home-based tailored exercise intervention for head and neck cancer patients during chemoradiotherapy
Interne Geneeskunde en Dermatologie	Mehran Alizadeh Aghdam	Recombinant human C1 esterase inhibitor as a prophylactic treatment of idiopathic non-histaminergic angioedema: a phase 2 trial and follow-up
Interne Geneeskunde en Dermatologie	Sigrid van der Veen	2,3 diphosphoglycerate detection via direct infusion high resolution mass spectrometry correlates with quantitative detection in blood with patients with sickle cell disease
Julius centrum	Dagmar van Nimwegen	Psychosocial care after stroke as provided by the multidisciplinary team in stroke services
Julius centrum	Marinde Bond	Treatment strategies in patients with initially unresectable colorectal cancer liver-only metastases: phase III randomised controlled CAIRO5 study of the Dutch Colorectal Cancer Group
Julius centrum	Jorna van Eijk	Multi-center, registry-based nationwide study of the (cost)-effectiveness of telemedicine in heart failure patients in the Netherlands. Design and recruitment of the Release-HF study
Julius centrum	Anum Zahra	A study protocol for external validation of eight COVID-19 prognostic models for predicting risk of mortality after presenting with COVID-19 infection in the elderly population in hospital, primary care, and nursing home setting

Laboratoria, Apotheek en Biomedische Genetica	Ilva Stellingwerf	Cancer cell metabolism and cold atmospheric plasma treatment
Laboratoria, Apotheek en Biomedische Genetica	Laura Claus	GeNepher: building a biobank for (suspected) hereditary renal disease
Laboratoria, Apotheek en Biomedische Genetica	Thijmen Sijnesael	Canonical Kairo target genes define a functional classifier for ILC
Vitale Functies	Antionette van Riel	Alarming increase in poisonings from recreational nitrous oxide use after a change in EU-legislation: inquiries to the Dutch Poisons Information Center
Vitale Functies	Annette Nugteren-van Lonkhuyzen	New Psychoactive Substances poisonings reported between 2017-2021 to the Dutch Poisons Information Center
Vitale Functies	Irma van den Hengel-Koot	4-Fluoroamphetamine (4-FA): before and after legislation
Vitale Functies	Diede Verlaan	Examining pancreatic stone protein plasma response associated with nosocomial bacteremia: a matched event analysis
Vitale Functies	Marije Marsman	Implementation of a liberal fasting policy for clear fluids before surgery: effects on fasting duration, patient well-being and complications
Vitale Functies	Corine Visser	Be(a)ware of the fentanyl patch: unusual accidental cases of fentanyl intoxication
Vitale Functies	Emma Rademaker	Immunoglobulin response in patients with community acquired pneumonia
Vitale Functies	Marieke Dijkman	Echis leucogaster bite induced venom induced consumption coagulopathy and thrombotic microangiopathy

Vitale Functies	Claudine Hunault	Acute intoxications with metoprolol, atenolol, and propranolol in obese and non-obese patients: a PBPK-PD modelling study
Vrouw en Baby	Bich Bui	The endometrial transcriptome of infertile women with and without recurrent implantation failure
Vrouw en baby	Eva Hermans	Hypoxic preconditioning of mesenchymal stem cells enhances their regenerative potential after neonatal brain injury
Vrouw en Baby	Judit Alhama Riba	Assessment of fetal growth restriction and postnatal brain in the reduced uterine perfusion pressure rat model
Vrouw en Baby	Federica Rugerri	Investigate the role of mesenchymal stem cell therapy on neuronal network restoration after hypoxic-encephalopathy
Vrouw en Baby	Chantal Kosmeijer	Timing of multiple-hits affects the pattern of myelination in a rat model of the encephalopathy of prematurity
Vrouw en Baby	Gaby Steba	Endometrium organoids cultured in transwells for increased access to the uterine lumen in vitro
Kind	Chantal Lebbink	2022 ETA Guidelines for the Management of Pediatric Thyroid Nodules and Thyroid Carcinoma
Kind	Annefleur Langedijk	Saliva as an alternative to nasopharyngeal swabs for the detection of RSV in infants
Kind	Marie Billard	Healthcare utilization for RSV-related respiratory infections in Dutch children 0-4 years of age
Kind	Joukje Willemsen	Maternal vaccination against RSV can substantially reduce childhood mortality in LIMCs: a mathematical modeling study
Kind	Emily Phijffer	Respiratory syncytial virus related complications on pediatric intensive care units (BRICK study)
Kind	Rita de Lima	Association between socioeconomic status, brain growth and 5 years neurodevelopmental outcomes of extremely preterm infants.
Kind	Julianna Lopez	The Socio-Economic Effect on White Matter Microstructure of the Preterm Brain.
Kind	Klaudia Wojtal	The role of active sleep in motor tracts development in preterm infants.
