

The image contains two line charts, both titled "Levering Evides totaal 2025".

The top chart is a line graph with the y-axis ranging from 0 to 100,000 in increments of 10,000. The x-axis shows years from 2010 to 2025. There are three data series: a blue line (top), a red line (middle), and a green line (bottom). The blue line starts around 40,000 in 2010, fluctuates, and peaks near 80,000 around 2016 before declining. The red line starts around 30,000 and fluctuates between 20,000 and 40,000. The green line starts around 10,000 and fluctuates between 5,000 and 15,000.

The bottom chart is a stacked area graph with the same axes and legend. It shows three stacked areas: blue (top), red (middle), and green (bottom). The total height of the stacked areas represents the total delivery, which shows a general upward trend from approximately 40,000 in 2010 to a peak of nearly 100,000 around 2016, followed by a decline.
