Impact
Centre

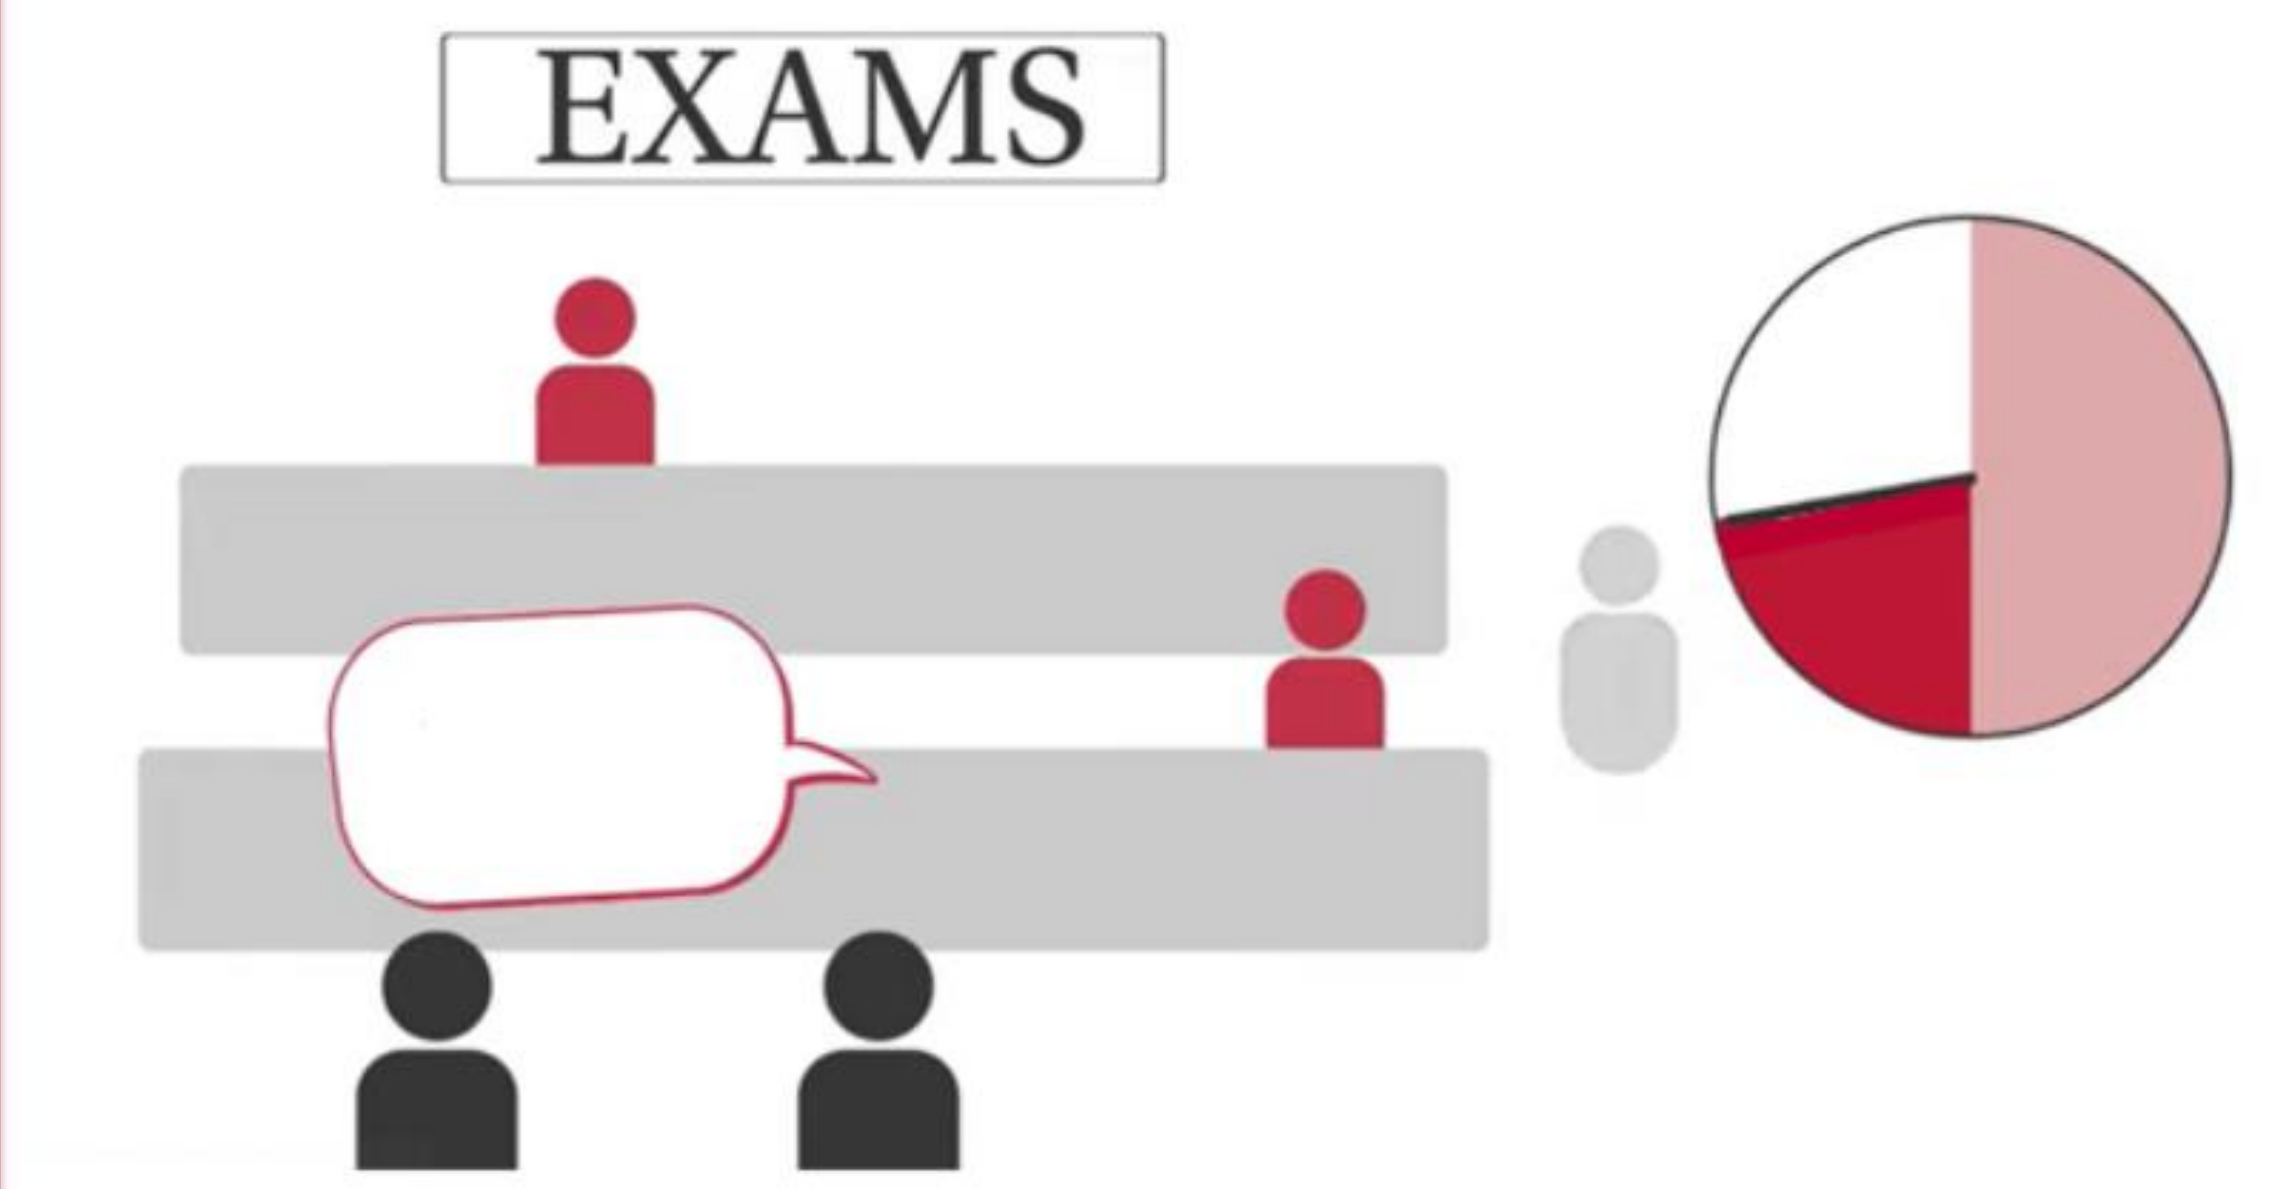

Who's involved?

At the faculty of science (FNWI), there are approximately **6.500 students** and **1.700 employees**.

Of all the students, **900 students** have applied for extra time during exams.

15% of students has dyslexia. These students are currently granted an **extra 30 minutes** to fill out their exams.

Experiences of students & staff

STUDENTS

Just giving a couple of minutes extra is not solving the problem, it is more like a treatment of the problem rather than prevention of dyslexia-unfriendly texts.

ECIO

Dyslexia-friendly education starts with the recognition of the problem

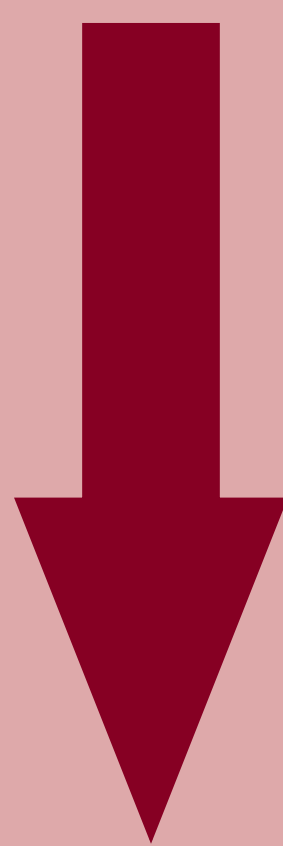

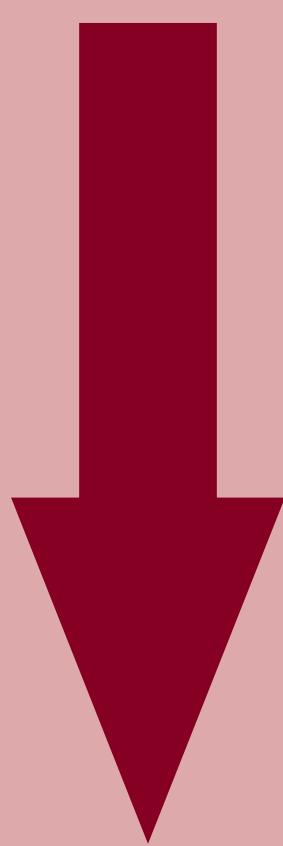

STAFF

I thought the resources we provide were enough, but apparently not. I would love to help, but don't know how? We, teachers, cannot do anything about the exam right?

Solution: Apply a dyslexia friendly font!

Just change the font! According to the ECIO and NKD, applying a dyslexia friendly font can help. There are multiple fonts, so what makes our suggestion the best? Well, it is an easy fix! Everybody can do it! What is the font and style composed of?

- Align: left**
- Line spacing: 1.5**
- Font: Verdana**
- Size: 12**
