

**»» Our support for families
no matter the distance**

Established in 2014, as a pioneering program of its kind worldwide, it ensures that distance is never a barrier to life-saving support. To date, the program has supported **thousands of family searches**, breaking down borders and bringing families together **in the global search for a match.**

09/2025

Together, we find out whether a family member is a match – across the world

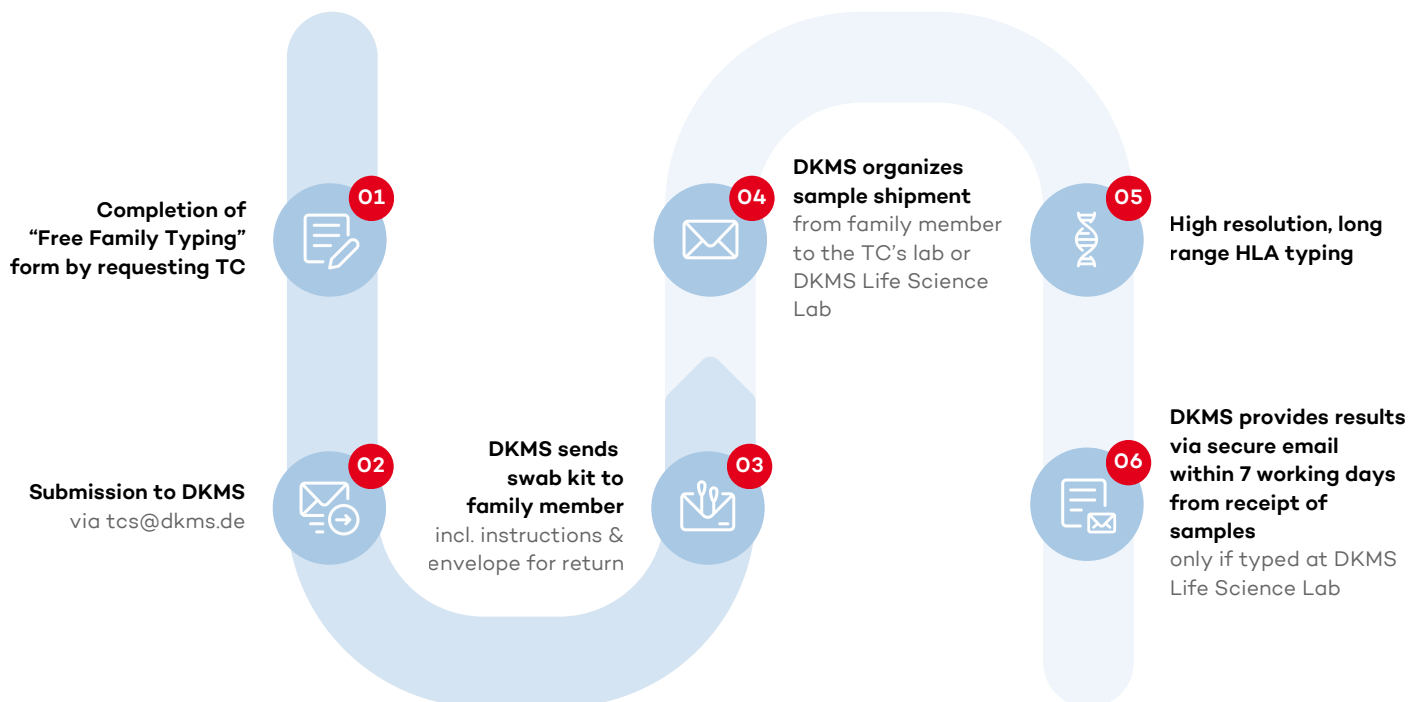

For patients in countries with limited infrastructure or with family members living abroad, obtaining samples for typing can be difficult. **For immediate family members** (parents, siblings, children), **DKMS provides assistance in obtaining and analyzing samples, free of charge.** DKMS will arrange sample shipment to the patient's country or typing at the DKMS Life Science Lab in Dresden, Germany.

25% probability of
finding a matching donor

Free of charge for
transplant centers and
families

DNA samples typed at
high resolution in a short
time

Pathway of our support

In addition, **DKMS can coordinate the workup of matched family members**, provided they live in a country with a DKMS entity (Germany, Poland, UK, Chile, India, South Africa) or are able to travel to one.

DKMS

DKMS Group gGmbH | Transplant Center Services
Kressbach Hofgut 1, 72072 Tübingen, Germany

Our organization is dedicated to the fight against blood cancer and blood disorders by:

- Creating **awareness** of the topic,
- **recruiting** hematopoietic stem cell donors to provide **a second chance at life**,
- **raising funds** to match donor registration costs, and
- supporting the **improvement** of blood cancer therapies **via our own research**.
