

# BUILD. MAINTAIN. PLAY.

At Sibelco, we'll help ensure that your surface is always in peak condition with our wide range of high-performance sands, top dressing and rootzone materials, engineered to your specifications. Our range of calibrated sands, top dressings, rootzones and other materials have been specially developed to meet the specific requirements of surfaces for different sports!

**TURFSIL Natural™** product range: for high-performance top dressings and rootzones, our sands can be mixed with an organic amendment such as peat or soil, or (in some countries) with an inorganic amendment such as zeolite or bentonite.

**TURFSIL Natural™** is the dedicated Sibelco range for:

**GOLF:** All sands in our golf range are washed and carefully graded in accordance with USGA 2018 recommendations. This guarantee of quality and consistency helps you to create and maintain pristine greens, fairways, tees and bunkers all year round.

**FOOTBALL & RUGBY PITCHES:** From local community football pitches to international stadiums and world-class training facilities, our **TURFSIL Natural™** range will help ensure that your pitch always performs at the highest level. As well as traditional turf surfaces, our **TURFSIL Natural™** products have been widely used in the new generation of hybrid pitches with outstanding results.

**“Sibelco sand is not dusty at all and has a fantastic colour – just an amazing playing experience.”**

*Dries Koehelkoren: Belgian International beach volleyball player*

**TURFSIL Artificial™** for synthetic turfs: Our **TURFSIL Artificial™** range of dried, coarse infill sands help to weigh down the carpet, improve drainage, minimize wear and prolong the life of the synthetic fibers. We work with customers to create high-performance and durable surfaces across a range of sports including tennis, football, hockey and padel. **TURFSIL Artificial™** sands are non – abrasive thanks to rounded shape and optimal particle size distribution.

**EQUESIL™** – the solution for Equestrian surfaces: Our **EQUESIL™** range of sands, combined with a stabilising fibre or rubber, help to create high performance equestrian surfaces with optimal levels of firmness and traction. Choosing the right sand is important for surface balance as well as ensuring drainage and durability. The **EQUESIL™** range is suitable for all types of equestrian systems including conventional, ebb and flow, reining, all weather, natural grass and gallops.

**COBANASIL®** – Beach sports: Sibelco **COBANASIL®** has been used at some of the world's leading beach sports events. Its attractive color, low dust content, sub-rounded particle shape and compactness combine to deliver the perfect playing experience for beach volleyball, soccer and tennis.

**COBANASIL®** meets all specifications stipulated by the International Federation of Volleyball (FIVB) and is approved and certified for Indoor Beach usage by the German Federation of Volleyball (DVV). We have been delighted to be indicated as sand of choice by Belgian international Beach Volleyball team.
