4. Customers with characteristics of vulnerability

The product is designed for Interest only mortgage market, which is likely to include some customers with characteristics of vulnerability or who will experience vulnerability over time.

Interest only mortgage customers maybe unaware of the different options available to them. They may not have a comprehensive understanding of the varying features of interest only mortgages versus the repayment equivalent, or the mortgage market; therefore not understand the impact of the various product features. This could impact the ability to compare the options available to them with ease.

Therefore, they may require additional advice and support to understand the information being presented to them and the implications of the arrangement they are entering into to reduce the risk of harm occurring.

We considered the needs, characteristics, and objectives of customers with characteristics of vulnerability as part of the design process for this range of products to ensure the product meets their needs.

We regularly conduct testing and monitoring of our product range to ensure good outcomes for our customers. This testing and monitoring includes a proportion of customers who have characteristics of vulnerability.

We have in place a framework to achieve good outcomes for vulnerable customers, which includes:

- Education and training for our colleagues to ensure they have the appropriate skills and experience to recognise and respond to the needs of vulnerable customers
- Suitable customer service provision and communications are in place
- Multiple contact methods are available
- Tailored communication requirements are available on request
- Flexible policies, where appropriate, to support vulnerable members
- Monitoring to ensure we continue to meet and respond to the needs of customers with characteristics of vulnerability.

Intermediaries should continue to comply with your obligations to ensure that you treat customers in vulnerable circumstances fairly.

Please contact us if you need any further information about how we support the needs of all our customers in relation to the Product.
