● Wetterbest

1985

Company founded
by Mr. Joris Ide

1996

Acquisition of Profinord
(Onnaing - FR)

2004

Acquisition of JI Auvergne
(Lempdes sur Allagnon - FR)

2006

Acquisition of JI Sud Ouest
(Hagetmau - FR)

2011

Start-up of satellite
JI Sud Ouest (Toulouse - FR)

Start-up of satellite
JI Auvergne (Sorgues - FR)

1994

First acquisition of a
Belgian company.
Other acquisitions
follow quickly

2001

First international
establishments
(Romania and France)

2005

Construction of JI Atlantique
(Bressuire - FR)

2007

Ergon investment of 51%
in the group

Acquisition of JI Bretagne
(Saint Caradec - FR)

2013

Creation of a Hub in
Ansbach (Germany)

Establishment of **Jl Est**
(Bignicourt sur Marne - FR)

2015

Acquisition of the Joris Ide
Group by Kingspan

2017

Takeover of a factory in
Stadskanaal (NL)

2021

Acquisition of **Wetterbest**
(Romania)

2023

Acquisitions :
Alaço (Portugal)
Toode/Janla (Finland/Estonia/Lituania)

2014

Launch of new building
Joris Ide **Façade**
(Bressuire - FR)

2016

Acquisition of **Balex Metal**
(Poland)

Implementation of a sales
office in **Gloucester (UK)**

2019

Establishment of
Jl Normandie
(Villers Bocage - FR)

2022

New investments:
Hildesheim (DE)
Baule (FR)

2024-2025

New buildings :
Hagetmau (Jl Sud Ouest)
Loisy sur Marne (Jl Est)

Acquisitions :

- **Rafinor and Eftex (Denmark)**
- **KZK (Netherlands)**
- **Siegmatal (Germany)**
- **Meta (Spain)**

Joris Ide West

Belgium, UK

3 production sites in Belgium

- **Zwevezele** (Hub): Profiles, panels, purlins
- **Isometall** (Manhay) : Mineral wool core panels
- **Liège** (Grâce-Hollogne): Metalstuds

1 sales site in Gloucester (UK)

Joris Ide West

Germany

2 production sites

- Ansbach (Hub)
- Hildesheim (Spoke)

German key products

- Composite panel: JI Roof 1000, JI Wall
- Highdecks: JID 85-280-1120, JID 100-275-825, JID 137-310-930, JID 153-280-840, JID 200-375-750
- Profiles: JID 35-207-1035, JID 40-183-915, JID 50-250-1000
- Purlins
- Flashings

Joris Ide West

Iberia

- 2 production sites
 - in Ourém (Portugal)
 - in Torremayor (Spain)
- Profiles
- Panels
- Decks
- Purlins
- Accessories

Joris Ide North

The Netherlands, Nordics

1 production site in Stadskanaal (the Netherlands)

- Profiles
- Steeldecks
- Façade

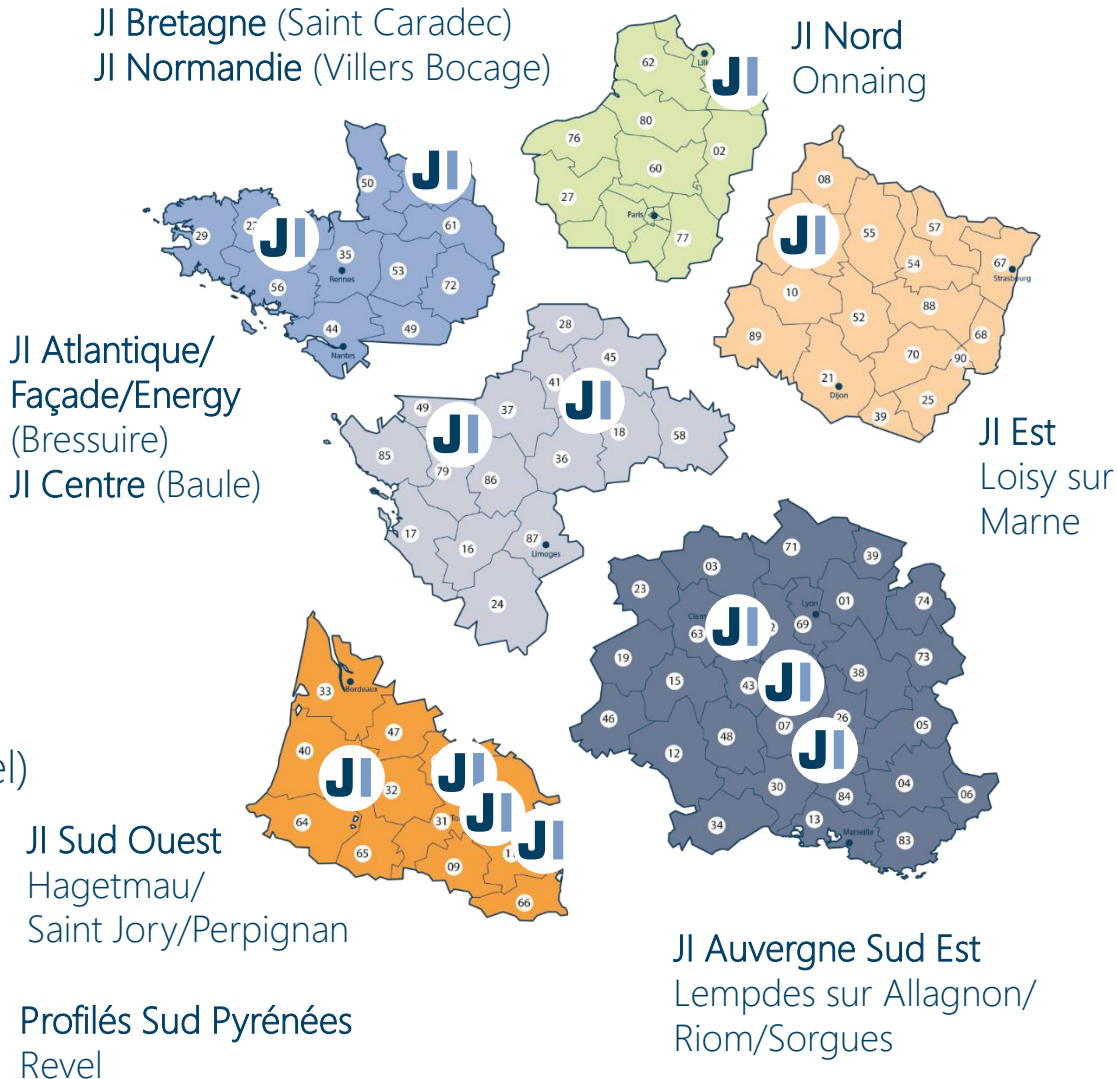

1 engineering site in Herning (Denmark)

Joris Ide France

France

- 12 production sites:
 - Profiles
 - Trays
 - Decks
 - Accessories
- Panels (Perpignan)
 - Façade/Energy (Bressuire)
 - Purlins (Riom)
 - Metalstuds accessories (Revel)
- Commercial repartition by region/departement

Our commitment to you

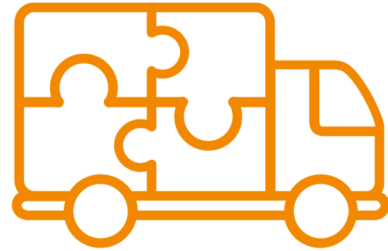

PROMISES

Strong values are what set Joris Ide apart. We are continuously evolving and growing. However, our mindset and the promises we make to our customers never change. You can count on that.

CLOSE TO YOU

A personal approach
with a local touch

ONE-STOP SHOP

Everything available
in one place

COMMITMENT

To our customers and
our service

PARTNERSHIP

Dedicated to long
term relationships

SUSTAINABLE

Making a positive
Impact for a better
future

The future of construction industry

Building a better world

The buildings of the future need to deliver more than ever before. They must combat climate change by maximising energy efficiency through superior thermal performance while incorporating products that are lower in embodied carbon across their entire lifecycle. Using less energy is not enough; buildings should generate their own energy too.

The trends driving our vision for sustainable buildings

We believe that in order to achieve truly future-proofed, sustainable built environments, all buildings must be designed, constructed and operated to deliver 5 key benefits for the wellbeing of people and our planet.

We are driving innovation in our products and our business to deliver 5 key drivers for sustainable buildings, with the ultimate goal of meeting the IPCC 1.5° climate change scenario.

5 key drivers for sustainable buildings

Energy efficiency: Reducing energy demand in buildings with products and services.

Embodied carbon: Minimising embodied carbon in materials and buildings.

Fire performance: Protecting people and property from fires.

Occupant Wellbeing: Harnessing the health benefits of daylighting and clean air.

Digitalisation: Empowering better building performance and construction efficiency.

About us

What makes us into us?

JORISIDE
THE STEEL FUTURE

OUR VALUES

- Responsiveness
- Proximity
- Passion
- Service
- Listening
- Innovation

OUR PRINCIPLES

- Reliable partner
- Long term approach
- Colleagues working as a team
- Flexibility and entrepreneurial spirit

OUR MISSION

- A leader in the advice of fast/flexible delivery of efficient total building envelop solutions
- Personalized local approach and a complete and competitive product offering
- Focus on future talents

OUR TARGETS

Achieve net zero emissions by focusing on the well-being of people and the planet. With our global sustainability programme, Planet Passionate, which aims to have an impact on three major global challenges

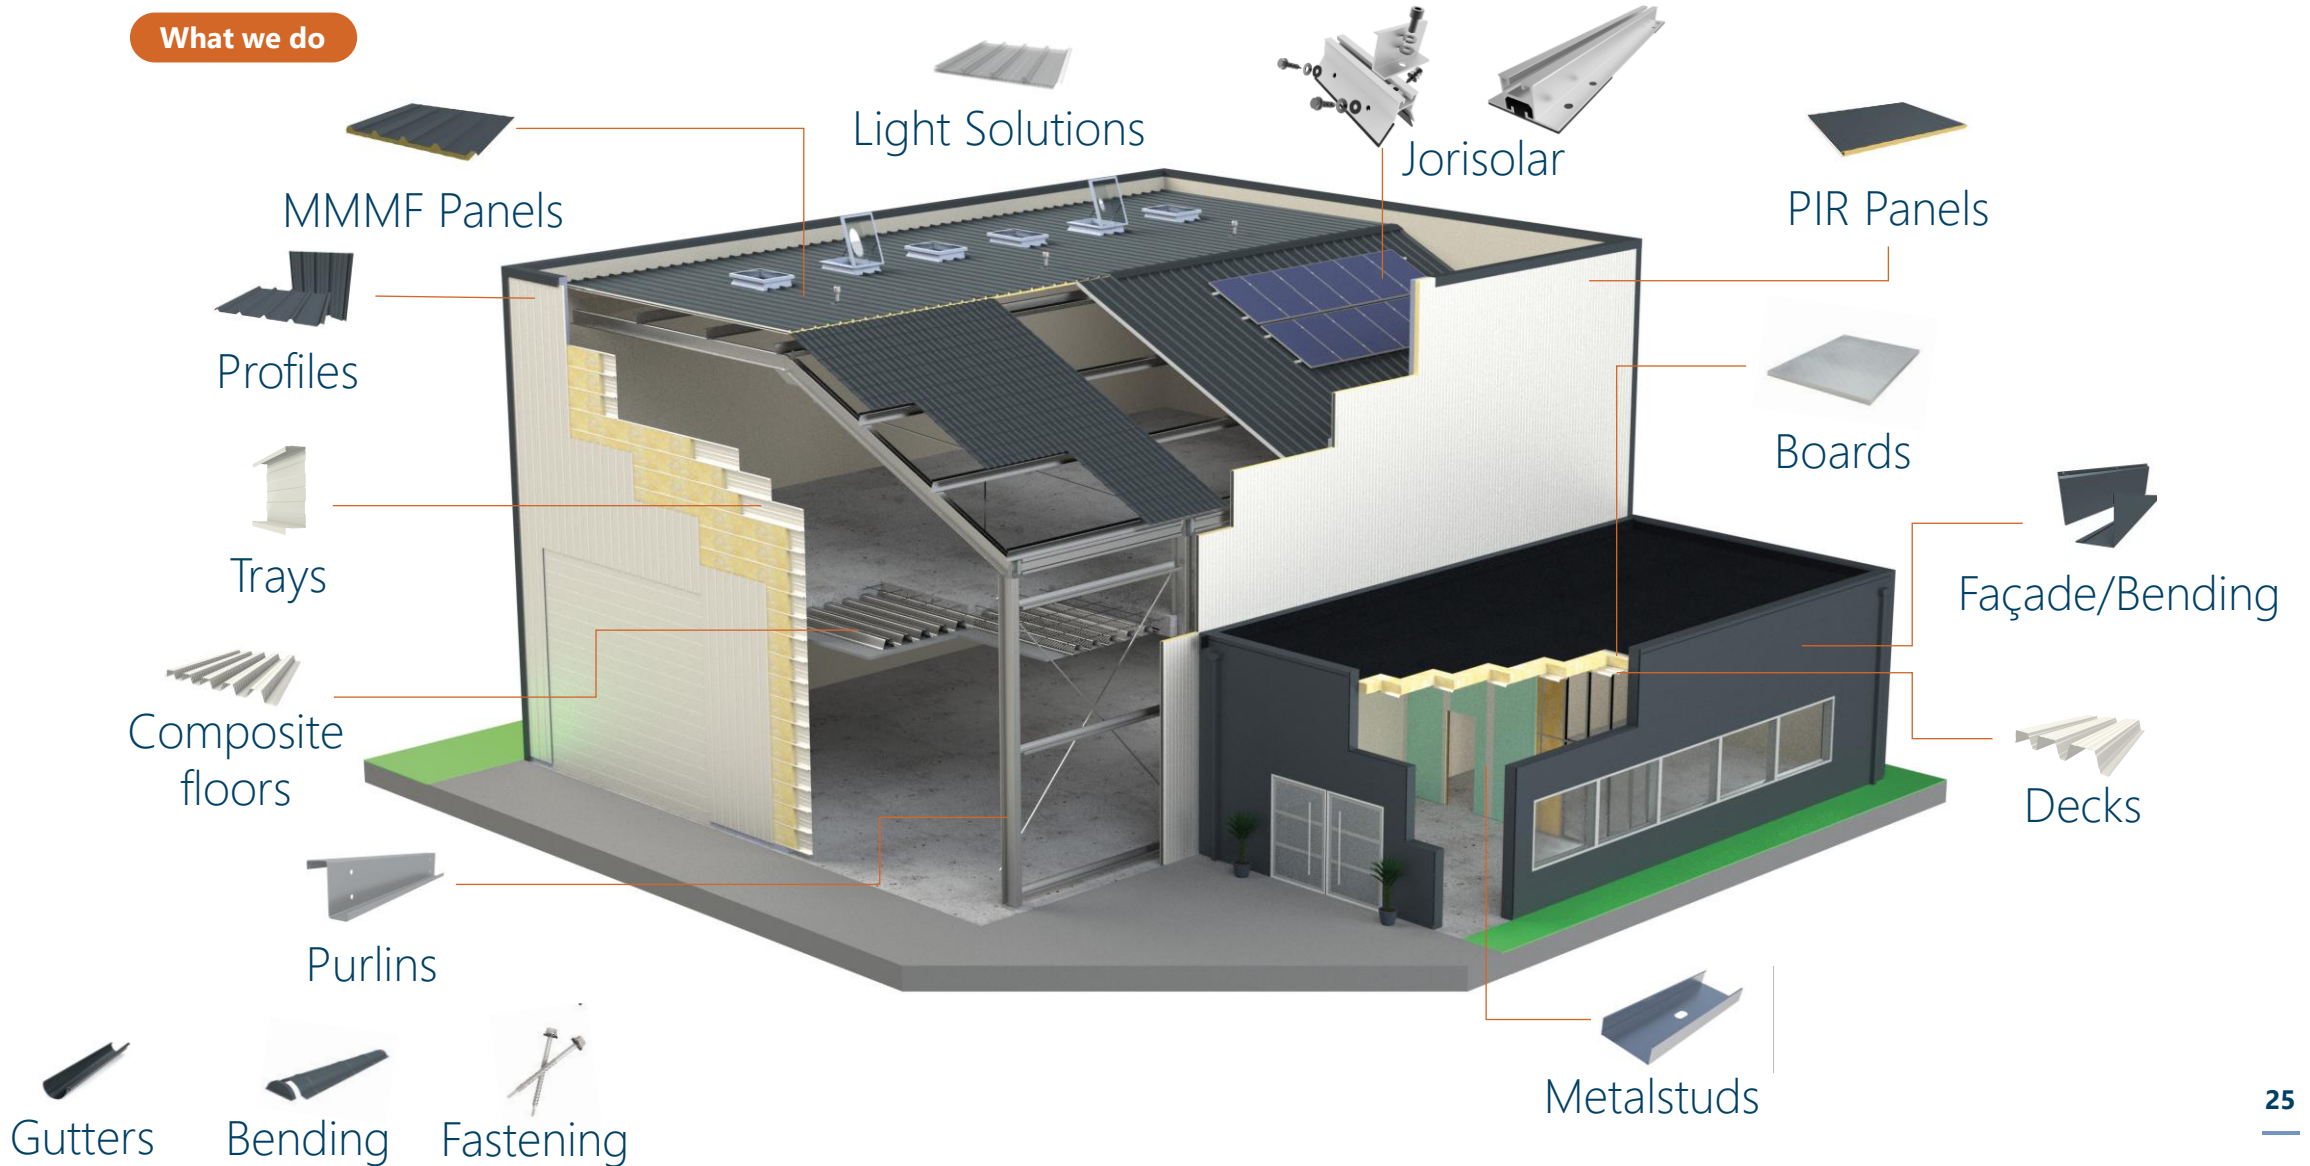

- Climate change
- Circularity
- Protection of our natural environment

What we do

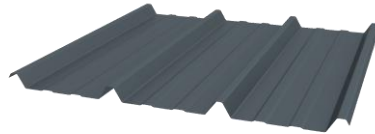

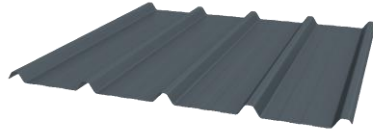

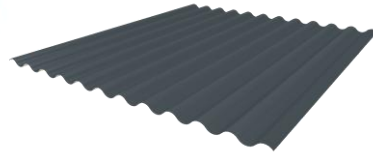

All you need to dress-up your building !

What we do

Roof profiles

What we do

A wide range of single skin profiles : corrugated, trapezoidal, standing seam aspect..

A wide range of coatings and colours

A large choice of possibilities by **combining** profiles into **built-up systems** and matching the building regulations

A network of experts for each country to guarantee an appropriate **technical assistance** in accordance to the national regulation

Could be combined with Solar fixing, light-solutions, accessories.

High mechanical resistance

Light Solutions

What we do

Joris Ide Light Solutions products can be used:

- on a **wide range** of buildings,
- **warm** roofs or **cold** roofs,
- with **low** or **medium** humidity.

To bring the light in your buildings, we have a large range of:

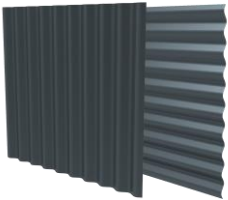

- Profiles
- lengths

Think about **combining** them **with other products** (profiles, panels)

Wall profiles

What we do

A wide range of single skin profiles : corrugated, trapezoidal..

A wide range of coatings and colours for architectural creativity

A large choice of possibilities by combining profiles into built-up systems

A network of experts for each country to guarantee an appropriate **technical assistance** in accordance to the national regulation

Could be combined with light-solutions, accessories.

Liner trays as an **alternative** to sandwich panels

Tiles / Permapan

What we do

Tiles that can be used at a minimum slope of 8°
(to be verified according to local standards)

Lightweight at only 5 kg/m²

All necessary accessories are available

Composite panel with tile effect allows a faster
installation time than standard built-up systems

Made to measure for your roof

Easy to install

Façade

What we do

Expertise in **aesthetic and technical** facade solutions

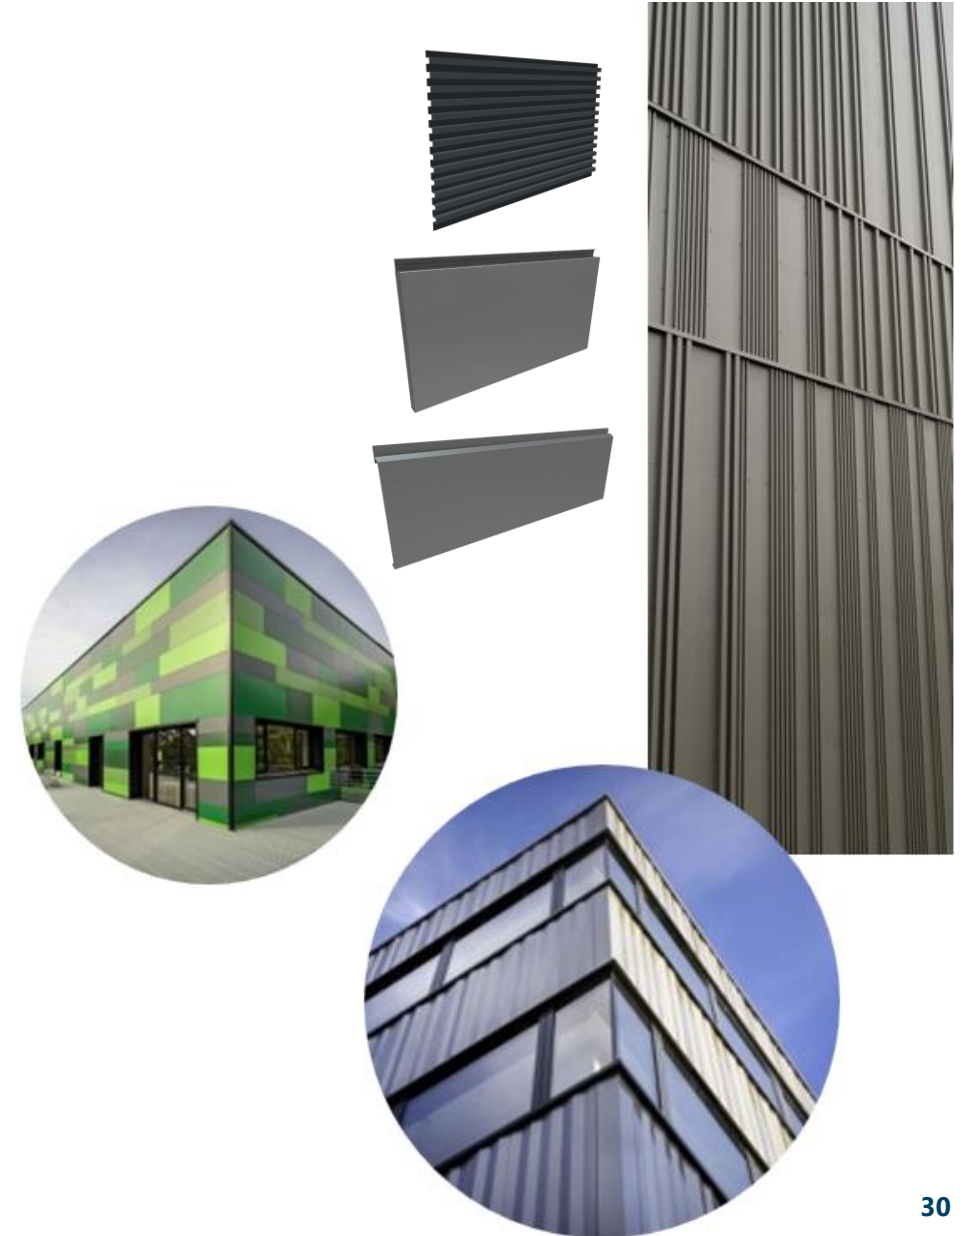

Products for **architectural creativity**

Large range of products with flat or ribbed aspects:
architectural profiles, sidings, cassettes

Special colors to give more freedom on creation to architects

Many possible variations for your facade through the 3 product categories & **Jl Magine concept**

Usable for **renovation or new constructions**

Highdecks

What we do

A wide range of **structural decks** with **different section profiles** to suit any of your projects

Products **certified to EN1090** as structural products

Full assistance in the design to standard loads and contribution of profiles in the building resistance and building stabilization (Diaphragm)

Aluminium or stainless steel decks to offer the **best solutions to high humidity inside environments**

Perforated profiles to increase the sound absorption for acoustic solutions (cinema, concert hall..)

Composite Panels - PIR

What we do

A high thermal performance

Some PIR Panels can reach until B-s1,d0 fire reaction

Wall panels in **visible** and **secret** fixing

Produced with the best quality management in **accordance** to ISO 9001

Product in line with environmental care, and **following** ISO 14001 in production

Produced according strong compliance **rules** following ISO 37301

Assistance in the product design

Mineral Wool core Panels

What we do

Made of a **non-combustible**, high density mineral wool core, our Vulcasteel range of panels achieves a **A2-s1,d0 fire reaction classification**

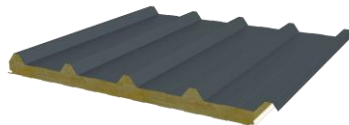

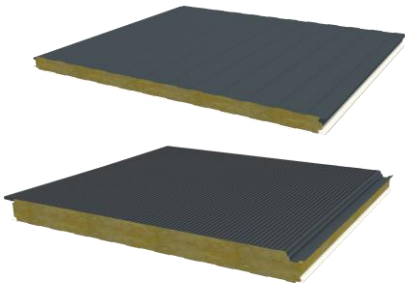

High **acoustic performances**, with the possibility of a perforated inner sheet for a better sound absorption (cinema, concert hall..)

Produced with the best quality management in **accordance to ISO 9001**

Product in line with environmental care, and **following ISO 14001 in production**

Produced according strong compliance **rules following ISO 37301**

Full assistance with calculations

Purlins

What we do

A very competitive and large range (Z, Sigma, Omega..)

A metallic appearance

Made to measure for your needs

Easy to install

Possible to combine with all of our products

Design department to support you on specific projects

Metalstuds

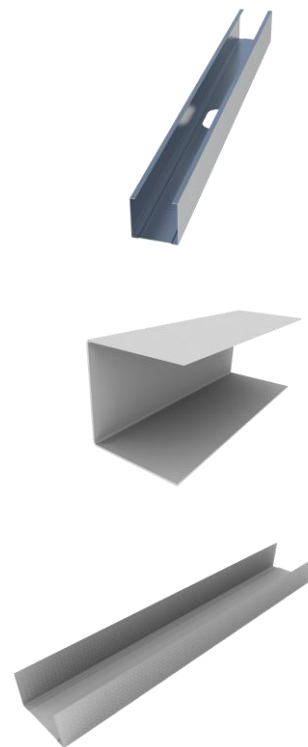

What we do

Full range of **horizontal** and **vertical** profiles for:

- all of the **partitions**,
- **linings**,
- and **ceilings**.

Accessories

Certified

Solar

What we do

Innovative solutions for all the applications:

- Pitched roofs
- Flat roofs
- Solar carports

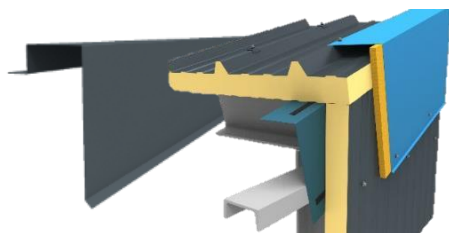

Integration with star products as:

- JI 45-333-1000
- JI Roof 1000
- JI Vulcasteel Roof

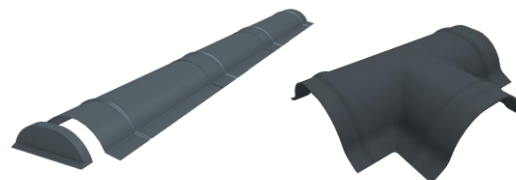

Accessories

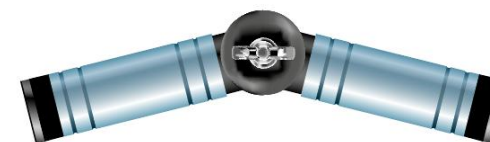

What we do

Flashings

Tiles Accessories

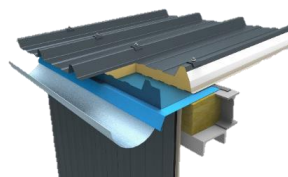

Purlins Accessories

Screws...

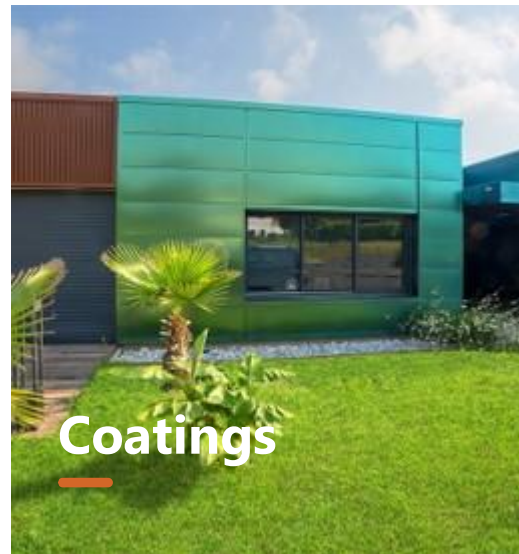

Rails, thermorooft fillers,
fasteners...

Gutters

Our solutions

R&D vision

New products launched

Our Steel Future solutions :

- Aesthetic
- **Insulated** : Thermal and Fire reaction performances
- **Energy** independence
- Less embodied carbon

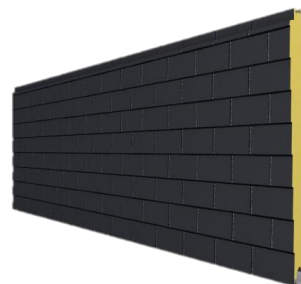

Jl Vieo Roof 1050

Insulated standing seam roof solution

Jl SF Slate 1000

Imitation slate composite panel

R&D vision

Products in the pipeline

Our Steel Future solutions :

- Aesthetic
- Insulated : Thermal and Fire reaction performances
- Energy independence
- Less embodied carbon

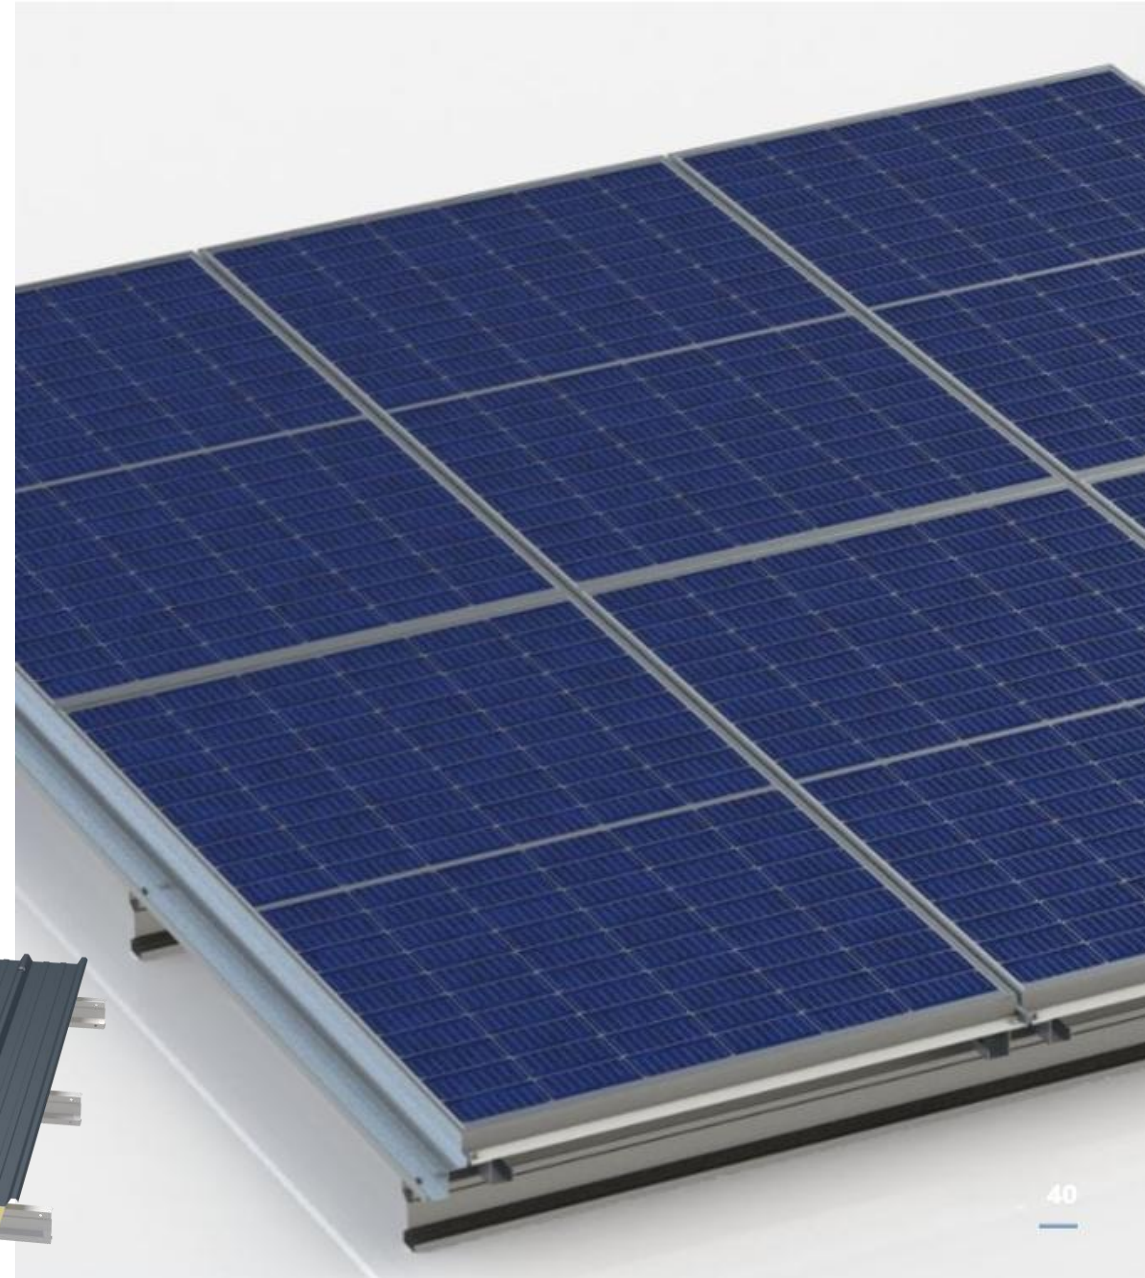

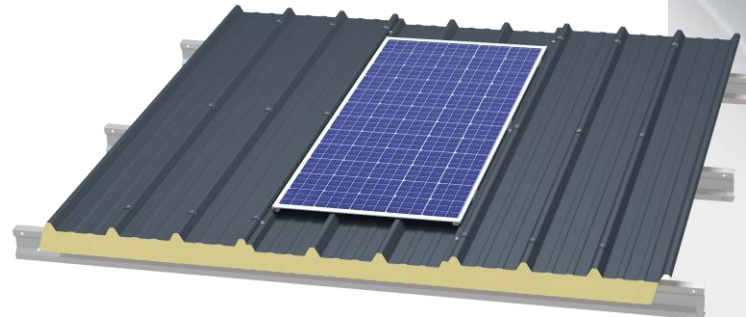

JoriSolar RS-Park 2

*Shade rail for solar carport system
for large car parks*

Jl Powerpanel

*Composite panels
with Solar PV integrated*

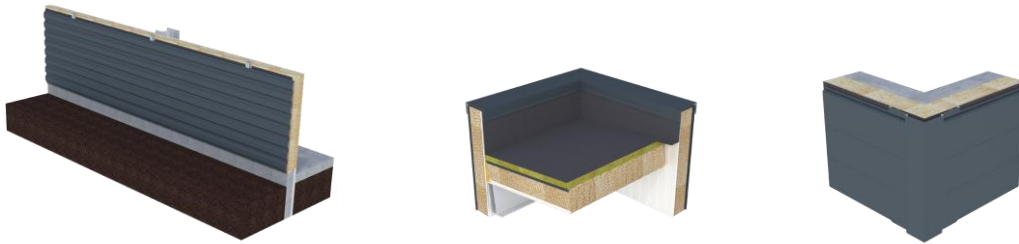

Development projects (institutional)

Incseb / Fishwall projects

In collaboration with other players on the market, we'll develop ultra-low carbon steel envelop systems which incorporate a wood fibre insulation: sandwich panels (pitch & flat roofing and cladding), double skin system and facade cladding.

Fishwall project

(Fire and Seismic performances of Hybrid fire WALLs in case of single-storey industrial and commercial steel.)

- Experimental data on the fire performance of lightweight sandwich wall panels spanning more than 4m;
- the fire performance of sandwich panel encasement used as fire protection for structural steel members.

Our People & Projects

JI Working Culture

1. LEARN & GROW

We believe in our people. That's why, from day one, you get a lot of responsibility. Work independently. Create your own path. Realise your ambitions. Look ahead. And always give it a 100%.

2. IT'S ABOUT YOU

Does your personality match the Joris Ide DNA? Then you're fine. Who you are as a person is more important than the diploma in your pocket. We like to make things personal and prefer to keep a good relationship with our employees.

3. INTERNATIONAL & INNOVATIVE

You can find Joris Ide all over Europe. We invest in our own future, but also in yours. Take part in our road to innovation and work with the latest technology and machinery.

4. A GREAT WORK ENVIRONMENT

Do you like your job better when you get along with your colleagues? Good, because we like to put collaboration and comradeship first. Even after working hours.

5. JOB SECURITY

Joris Ide continues to grow. That's why we are always looking for new people. Our vacancy pool is never exhausted, which makes the chances of finding your ideal job with us even greater. Secure your professional future for the long term

Joris Ide is People Passionate

People Passionate programme

Group-wide programme

Focus on **well-being and development** of our talents

Through **action plan** focused on :

- ✓ Recruitment
- ✓ Onboarding
- ✓ Policies
- ✓ Training and development
- ✓ Performance and Reward

Joris Ide Planet Passionate targets

Planet Passionate programme

Energy

- Increase our direct use of **renewable energy** to 60% by 2030
- Install **solar panels** on all roofs of our own buildings by 2030
- ISO 50001 certification for all priority sites: all sites consuming more than 5GWh of energy per year

Water

- By 2030, 3.4 million liters of our used water as the JI Division must come from **rainwater**

Carbon

- Reduce **Scope 1 and 2 emissions** by 70% by 2030 compared to the reference year 2020 (*market-based, excluding biogenic emissions)
- Reduce **carbon intensity** in our **key raw materials** by 15% by 2030
- Achieve more than 90% zero-emission car conversion

Circularity

- Launch **3 take-back/recycling schemes** by 2030
- Use 220k tons of **recycled or renewable raw materials** by 2030
- No more company waste sent to **landfill** by 2030

The benefits

Planet Passionate programme

By being Planet Passionate in our operations we aim to:

Contribute to the world's renewable energy mix

Accelerate the shift to zero emission cars and reduce air pollution

Less waste to landfill and more materials to be recycled

Reducing CO₂ emissions

Provide upcycling solutions for consumer plastic waste

Conserve precious water

Help to clean our oceans and protect wildlife

Through our Planet Passionate programme, our products will be:

Manufactured using **renewable energy** and harvested rainwater

Packaged in **recyclable** materials

Lower in **embodied carbon**

Containing **recycled materials** and recycled production waste

Environmental Product Declarations

Standardized Environmental Information

Our current EPD portfolio consists of EPDs published with various programme operators such as IBU, International EPD System and EPDHub.

In addition, our individual EPDs for our sandwich panels can also be found on [Ecoplatform](https://ecoplatform.epdcentral.com).

We also comply with country-specific publications such as the French programme operator INIES and, in the Netherlands, the National Environmental Database.

Nationale
Milieu
DATABASE

JORISIDE
THE STEEL FUTURE

Environmental Product Declaration

In accordance with ISO 14025:2006 and EN 15804:2012+A2:2019/AC:2021 for:

JI Roof 1000

from

Joris Ide

Programme:	The International EPD® System, www.environdec.com
Programme operator:	EPD International AB
EPD registration number:	EPD-IES-0024018
Publication date:	2025-06-10
Valid until:	2030-06-10

An EPD should provide current information and may be updated if conditions change. The stated validity is therefore subject to the continued registration and publication at www.environdec.com

Planet Passionate communities

Local/Partnership

Planet Passionate Communities is the philanthropic arm of our ambitious sustainability programme, Planet Passionate.

Our Planet Passionate Communities initiative is having both a local and global impact.

Every year we will dedicate **funds and resources to support projects** in communities that we are part of and that are aligned with our Planet Passionate ambition of creating a world that is powered by renewable energy, net-zero carbon, and protects the earth's valuable resources by reducing, re-using and recycling.

Our services

Availability

Each site within the group has both a wide local stock and access to the entire product range of the group.

Technical assistance

A network of experts for each country for an appropriate response (thermal, acoustic, etc.).

Quality

ISO 9001 quality system
ISO 14001
ISO 37301
FM Approval
BES 6001
LPCB Product range with CE marking

Transport

Direct delivery to the customer and/or on the project site.
Daily regional shuttles feeding a customer network.

Our services

Marketing

Samples, brochures, website with up-to-date information... at www.jorisode.com

Digitalisation

Track orders and invoices in real time and access up-to-date product information in one click on our digital platform. Get full transparency

E-commerce and Product Configurator in Belgium

Training

We provide training, both internal (for our employees) and external (for our clients)

Customer satisfaction survey programme

JI Continuous innovation through digitalisation

Continuing Customer and Product Research

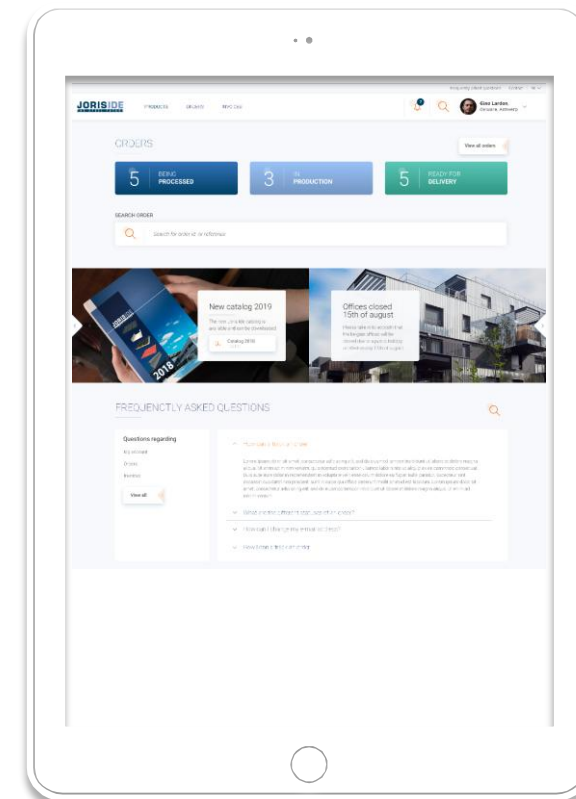

- In all markets
- To provide innovative solutions

Communication to Exchange Knowledge

- With our customers
- With our People: JI App
- With other Divisions

B2B Portal & B2C e-commerce Site, Product configurator that allow customers to:

- Follow up their orders
- Order MTS products online
- Download all documents related to their order
- Configure your project..

Rugby Stadium ARENA, Paris La Défense

J1 Grégale 300, 10.000 m²

A low-angle, upward-looking photograph of the L'Arbre Blanc building in Montpellier. The building is a multi-story residential structure with a complex, organic design. It features numerous balconies and terraces that protrude from the main facade, creating a dense, layered appearance. The balconies are enclosed with white metal railings and some have glass panels. The building's facade is primarily white, with some sections showing a grid-like pattern of windows. The sky is a clear, deep blue, providing a stark contrast to the white building. The overall composition emphasizes the verticality and unique architectural style of the structure.

L'Arbre Blanc - Montpellier

Jl Vulcasteel Roof – 80mm for the balconies, 4000 m²

Airport Parking F4 Mulhouse-Bazel

Custom made Façade profile, 12.000 m²
