

# Highfield Level 3 End-Point Assessment for ST0954 Aviation Movement

## Specialist Mock Assessment Materials

### Observation with questioning

Assessment Criteria	Achieved
<b>OB1</b> - Selecting vehicle(s) and equipment relevant to the aircraft and the type of aviation movement, monitoring the marshalling according to the standard operating procedures of the organisation.	
<b>OB2</b> - Demonstrates the preparation and use of aviation systems, justifying any remedial action taken to address faults or errors.	
<b>OB3</b> - Demonstrates the coordination of a planned aviation movement justifying communication methods and language to reflect the task/situation.	
<b>OB4</b> - Demonstrates the monitoring of a team to ensure correct preparation of the airside work area and/or vehicles for marshalling of aircraft and/or vehicles. Assumes responsibility for their own actions and those of the immediate team.	
<b>OB5</b> - Monitors and supervises team members carrying out daily inspections prior to using specialist equipment, safely operating, and storing in allocated areas after use.	
<b>OB6</b> - Performs tasks within their area of responsibility in compliance with legislative/organisational guidelines and if encountered addresses and/or reports hazards.	
<b>OB7</b> - Evaluates potential security risks within their area of operation and responds if any are identified by following the procedures/policies of their organisation.	
<b>OB8</b> - Reviews tasks to ensure there is compliance with legislative safety guidelines for aircraft, vehicles and team members during airside operations. Demonstrating an approach to work which prioritises the safety of everyone by following industry legislative guidelines/procedures set out by the organisation.
