End-point assessment method – **A practical assessment with questioning, an interview underpinned by a portfolio of evidence and a multiple-choice test**

Working as a Fire, Emergency and Security Systems Technician

A Fire, Emergency and Security Systems Technician in this occupation will be responsible for the planning, installation, testing, commissioning and handover of fire, or security systems equipment. Technicians will do this in accordance with customer requirements, industry regulations and company quality standards. The broad purpose of this occupation is to protect individuals, homes and properties from risk and danger. Technicians can often find themselves working in and outside business premises and customers' homes.

The programme's structure

Apprentices will be placed in a role over a minimum of 12 months during which they will be supported while on-programme by their tutor. The tutor will review the progress of the apprentice against the standard to ensure they are prepared for the end-point assessment.

Your apprentice's journey

Ready for training

- Initial assessment
- English and maths training
- On-programme training to meet the requirements of the standard
- Gateway readiness self-assessment

Set for assessment on completion of training and functional skills

End-point assessment methods are:

Practical assessment with questioning

- A 9-hour practical assessment consisting of 3 tasks
- A minimum of 3 questions will be asked

Interview underpinned by a portfolio of evidence

- A 60-minute interview, with a minimum of 6 questions
- A portfolio of evidence will have been completed to support the answers in the interview, the portfolio will not be assessed

Multiple-choice test

- A 75-minute test consisting of 60 multiple-choice questions

Go further

By the end of this apprenticeship the apprentice will be eligible for recognition from The Institute of Engineering and Technology for Engineering Technician (EngTech).

Available support
